DEEPTECH & AI

BIOPTIMUS

Bioptimus is a global AI tech company pioneering the world's first universal foundation model for biology. By combining cutting-edge AI with massive multimodal, proprietary data generation, Bioptimus is building a unifying framework that connects all scales of biology—from molecules to patients—delivering interpretable, dynamic, and actionable insights. The company's first foundation model, H-optimus, is an industry-leading model for digital pathology being adopted across research, drug discovery, and clinical pipelines.

GREEN INDUSTRY

CARESTER
Your partner for Rare Earths

Carester supports rare earth deposit operators in developing
and optimizing their processes with a responsible, tailored approach.
The company is also building an innovative rare earth oxides
production plant in France, integrating recycling and mineral
concentrates to create a sustainable, circular model
that strengthens European industrial sovereignty.
#RareEarths #SustainableIndustry

Frédéric Carencotte, CEO
carester.fr

KONBOI
SUPERHUMAN AI DRIVER

Konboi, a French smart mobility startup, develops AI technologies to
decarbonize road freight. Its first product, Hypermile, reduces truck
fuel consumption by 11% and CO_2 emissions by 22 tons per year,
while paving the way
for sovereign autonomous driving.

sweetch energy

Sweetch Energy is a French deeptech company developing a new source of renewable electricity: osmotic energy. This natural energy arises when freshwater meets saltwater and can be harvested to produce continuous, predictable power with no need for critical materials. Sweetch Energy's proprietary INOD® technology harnesses osmotic energy — a 100% natural, renewable, and massively abundant resource with the potential to meet over 15% of global electricity needs. The company recently inaugurated its first pilot industrial production line and deployed its first osmotic power demonstrator — a key milestone toward scaling up osmotic energy.
#EnergyTransition #RenewableEnergy

Nicolas Heuzé, CEO & Co-founder
sweetch.energy

VK VERKOR

Founded in 2020 in Grenoble, Verkor is a European industrial company supported by France 2030 and a strong network of financial and industrial partners. Its ambition: to accelerate the production of low-carbon batteries in Europe to help decarbonize energy use and create value across our regions.
With an agile and sustainable business model, Verkor attracts top talent from around the world. After launching a fully digital pilot line in 2023, its first Gigafactory in Dunkirk is now operational and will produce its first cells in 2026
#Gigafactory #Batteries

Benoit Lemaignan, CEO & Co-founder

CLIMATE TECH

⟨⟩ Dioxycle

Dioxycle converts industrial carbon emissions into sustainable chemicals with unprecedented energy and cost efficiency. Dioxycle leverages a novel proprietary 'carbon electrolyzer' to produce critical everyday chemicals like ethylene, the world's most used petrochemical ($200 Bn market). By retrofitting existing industrial plants, Dioxycle transforms waste emissions into value and strengthens supply chain resilience. Since launching in 2021, Dioxycle has raised $40 m from top-tier investors including Lowercarbon Capital, Bill-Gates-founded Breakthrough Energy Ventures, and Gigascale Capital. The team has delivered an industrial scale pilot and is now partnering with leading chemical manufacturers and consumer brands to commercially deploy its disruptive technology. #Sustainablechemicals #Carbonelectrolysis
