France at the India AI Impact Summit 2026 Meet the French Delegation

Shaping AI For Humanity, Inclusive Growth & a Sustainable Future

New Delhi | India | February 16-20

Meet the French AI delegation

France's expertise in AI is lauded worldwide. Discover the latest french tech innovations at the India AI Impact Summit.

Business France and La French Tech Mission are partnering to bring a delegation of 87 French companies to India from February 16th to 20th to meet with key stakeholders and forge business opportunities.

The French Pavillon at the AI Impact Expo hosts 23 exhibitors and a rich conference program with key players

about the impact of AI: come see us !

Representing the strength and diversity of the French ecosystem, the delegation includes major corporates, fast-growing startups, academic institutions, and public organizations at the forefront of AI development.

Supported by and aligned with the France 2030 strategy, the delegation shares a common ambition: to accelerate the responsible adoption of AI, foster international cooperation, and deliver technological solutions with strong economic, social, and environmental impact. Through this mission, French companies aim to build long-term partnerships and contribute actively to the global AI ecosystem.

Join us in driving the future of AI!

About Business France

Business France is the public consulting business serving the international development of the French economy.

Business France is the public consulting business serving the international development of the French economy. It is responsible for fostering export-led growth by French businesses, as well as promoting and facilitating foreign investment in France.

It promotes France's firms, business image and nationwide attractiveness as an investment location, and also runs the V.I.E program.

Business France has more than 1,400 personnel, both in France and in 53 countries throughout the world.

In 2024, support from Business France made it possible to generate €1.8 billion in additional export revenues for French SMEs and mid-size companies, accounting for more than 31,010 jobs created or planned. Business France supported 59% of the 1,878 foreign investment decisions in 2025, accounting for 74% of the 47,734 projected jobs

More info: <https://www.businessfrance.com>

About Mission French Tech

Mission French Tech is the French government's dedicated administration for start-ups and scale-ups. It drives the development of France's innovation ecosystem and promotes French tech champions worldwide.

Created in 2013, Mission French Tech designs and implements public policies for start-ups, connects key ecosystem players, and positions France as one of the world's leading hubs for innovation. The "French Tech" label also refers to the broader ecosystem of start-ups, alongside investors, incubators, accelerators and corporate partners shaping France's tech economy. French Tech is supported by a unique international network, including 114 French tech hubs throughout France and in 52 countries.

A large-scale tech powerhouse...

- 35 unicorns and 1 decacorns, 18,000 active start-ups
- French Tech Next40/120 features France's fastest-growing start-ups and scale-ups
- France #1 hub for gen AI in Europe and #3 worldwide
- France #1 tech ecosystem in Europe

...delivering world-first innovations.

- France stands out for the diversity of its tech sectors. Beyond software, the ecosystem is strongly positioned in AI, deeptech, greentech, health and industrial tech.
- A proven ability to deliver frontier breakthroughs: from robots navigating inside the human brain, to satellite-to-satellite docking technologies, and infrastructure enabling telecommunications in the most remote regions.
- 100,000 AI specialists/year trained in world-class research institutions and engineering schools

A word from our partners

India's energy landscape is evolving rapidly, and TotalEnergies is proud to contribute to this transformation. With nearly USD 5 billion invested since 2019 across natural gas, LNG and renewables, TotalEnergies has signaled strong confidence in India's sustainable energy future. The commissioning of our Dhamra LNG terminal, the first on India's east coast, significantly strengthens energy accessibility to nearly 35% of the population and supports India's push toward cleaner, more reliable and more affordable energy. We have invested over USD 3 billion in Adani Green, India's leading renewable energy company.

In the field of Artificial Intelligence and Digital technology, TotalEnergies' has created a digital transformation center in Pune in collaboration with India's Tata Consultancy Services. The TotalEnergies Digital Factory in Pune has moved to an end-to-end approach, and is now working on the deployment and maintenance of the digital solutions.

AI is becoming a powerful enabler across the global energy sector, and TotalEnergies is actively deploying AI to optimize LNG operations, enhance grid integration, forecast more accurately renewable energy output, and improve asset efficiency and safety. These technologies are accelerating decarbonization while helping deliver the affordable, dependable energy that India's growing economy requires.

Dr. Sangkaran RATNAM
TotalEnergies Country Chair, India

A word from our partners

India is a strategic country for CMA CGM and essential to our global development.

For more than 30 years, we have grown alongside India's trade ambitions, building strong shipping, port terminals, logistics, talent capabilities and now media across the country.

Today, with 17,000 employees in India and investments in terminals, shipbuilding, innovation, and seafarer development, CMA CGM is deeply committed to India's maritime and logistics future.

Our Group's participation in the India–France Year of Innovation reflects our shared belief that technology, industrial cooperation, and human expertise will shape the next generation of global supply chains. The creation of our R&D hub in India and our partnership with Cochin Shipyard to build LNG-powered vessels demonstrate our long-term confidence in the country.

As India's global role continues to expand, CMA CGM will remain a trusted, long-term partner connecting India to the world.

Mr. Atit Mahajan

MD, CMA CGM India

The leading business event between India and France

Ambition India is a high-level business forum designed to strengthen economic partnerships between India and France. As part of the Franco-Indian Year of Innovation, the event is taking place on **28 April 2026** at **Business France headquarters in Paris**. It brings together leading French companies, decision-makers, and sector experts to engage with Indian corporates seeking innovative and competitive solutions from France. The event is held at a particularly strategic moment, following the **recently signed Free Trade Agreement between the European Union and India**, which significantly enhances market access, reduces trade barriers, and creates new opportunities between Indian and European companies. Through **high-level panel discussions** and **targeted B2B meetings**, the forum will showcase French and Indian expertise across priority industries, including healthcare and life sciences, aerospace and space, agri-food, luxury and lifestyle, sustainable cities, renewable energy, and artificial intelligence. Designed as a business-driven platform, Ambition India offers Indian companies a unique opportunity to:

- gain direct access to French technology providers and solution leaders,
- explore strategic partnerships, sourcing opportunities, and joint projects,
- and engage in targeted B2B meetings with selected French companies.

About

TotalEnergies has operated in India since 1993, employing over 1,000 people, 99% of them Indian nationals. Supporting India's shift to gas and renewables, it partners with PSUs—running India's first underground LPG storage with HPCL and developing bitumen plants with IOCL. Since 2018, its \$5 billion alliance with the Adani Group spans city gas (ATGL), LNG regasification at Dhamra (ATPL), and major renewable projects through AGEL. TotalEnergies also provides LPG, lubricants, and specialty fluids, backed by its Mumbai Technical Center. Through Hutchinson and SAFT, it manufactures automotive components and energy storage systems, while advancing on the Mozambique LNG project with Indian partners.

POSITIVE AI

About

Positive AI is a Do Tank of AI practitioners, created by and for those who design, build, deploy, and operate ethical and responsible AI systems. With nearly 30 members from leading companies, we collectively build responsible AI by developing a shared reference framework that turns principles into concrete, operational practices. Positive AI also facilitates hands-on workshops where members exchange best practices and collaboratively develop solutions. Positive AI further proposes a Responsible AI label to assess and recognize companies for the maturity and credibility of their responsible AI approach. We are convinced that ethical and responsible AI can be developed while sustaining innovation and performance, and that AI should be designed to empower humans and society, not to replace them.

About

QbitSoft offers a Quantum-as-a-Service platform that enables companies to leverage quantum computing today to enhance operational efficiency in near real time, without requiring quantum expertise or dedicated infrastructure. Its library of quantum applications includes multi-constraint optimization, tampered image detection, resource allocation optimization, and explainable clustering. The solutions integrate seamlessly with existing processes to optimize a critical function without disrupting operations. QbitSoft helps organizations improve decision-making, reduce costs, and increase efficiency across sectors such as logistics, insurance, transportation, and finance.

Xavier Pereira | Chief Growth Officer
Phone: +33 7 44 81 43 40
Email: xavier.pereira@quandela.com
www.quandela.com

About

Quandela designs and develops photonic quantum computers aimed at solving complex industrial problems beyond the reach of classical computing. Leveraging a unique technology based on single-photon sources, integrated photonic circuits, and advanced quantum algorithms, Quandela offers a comprehensive solution ranging from hardware to software, accessible via the cloud or on-premise. Its solutions address the needs of industry, research, and defense players to accelerate optimization, simulation, and artificial intelligence. Quandela also supports its customers with integration services, training, and co-development.

Quobly

Ny Kolo Rahasa | Communications officer
Phone: +33 6 50 154152
Email: nykolo.rahasa@quobly.io
www.quobly.io

About

Quobly is a pioneer in the development of a fault-tolerant quantum computer based on semiconductor qubits. With a breakthrough method, Quobly addresses both techno-scientific challenges as well as industrial production, paving the way for mass production of the millions of qubits essential for practical, large-scale quantum computers. Based in Grenoble, the startup is the result of 15 years of collaborative research between CEA Leti and CNRS. Founded in 2022, Quobly has brought together a team of experts from the semiconductor industry and researchers in quantum technologies. In 2023, Quobly made headlines with a seed round of 19 million euros, establishing a new record for seed funding of a European startup in the quantum sector. Today, Quobly employs +80 people.

SCALITY

www.scality.com

About

Scality solves organizations' biggest data storage challenges — security, performance, and cost. Designed to provide the strongest form of immutability plus end-to-end cyber resilience, Scality solutions safeguard data at five core levels for unbreakable ransomware protection. Delivering utmost resilience, Scality makes storage infrastructures limitlessly scalable in all critical dimensions. The world's most discerning companies trust Scality so they can grow faster and execute AI data-driven ideas quicker — while increasing efficiency and avoiding lock-in. Recognized as a leader by Gartner, Scality S3 object storage software is reliable, secure and sustainable.

About

Sekoia.io is the European cybersecurity technology company, leading provider of detection and response solutions boosted by AI and Cyber Threat Intelligence. By combining threat anticipation through knowledge of attackers with automation of detection and response, the Sekoia AI SOC platform provides security teams a unified view and total control over their information systems. Its open approach and interoperability with third-party solutions enable organizations to take full advantage of their existing technologies. Sekoia.io gives its customers the means to focus their human resources on high value-added missions, optimize their cyber-defense strategy and regain the advantage against advanced cyber threats.

Shark Robotics

Contact

Bruno Cruchant | Directeur des affaires publiques
Phone: +33 6 32 02 66 58
Email: bruno.cruchant@shark-robotics.fr
www.shark-robotics.com

About

Shark Robotics is a French engineering company specializing in robotic systems for firefighting and intervention in high-risk environments. Our robots support first responders where heat, smoke, toxic atmospheres or structural instability limit human access, enhancing safety and operational reach. As India's rapid urban and industrial growth increases the severity of fire scenarios, robotics brings decisive added value by reducing human exposure. Active in India with robots operating in Mumbai and Hyderabad, Shark Robotics also serves leading fire services worldwide, from Paris and Ukraine to Singapore, Thailand and Los Angeles.

S K Y N O P Y

About

Founded in 2023 by Pierre Bertrand (CEO) and Antonin Hirsch (CTO), Skynopy provides a satellite connectivity solution enabling operators to access their spacecraft simply, rapidly, and reliably. Its global network—17 operational sites deployed in just 18 months—already supports around ten satellite operators. Skynopy is also scaling through the AKAR project, developed in cooperation with Eutelsat. This programme aims to deploy the first S-, X-, and Ka-band ground station network delivering real-time, high-throughput connectivity for Earth observation satellites.

Talan

Mehdi Houas | CEO & Founder
Phone: +33 6 07 94 80 24
Email: mehdi.houas@talan.com
www.talan.com

About

Founded in France, Talan has grown into an international group that supports our clients in their end-to-end Data & AI transformation by combining strategic & management consulting with technological expertise.

With over 6,800 employees across five continents, we accelerate our clients' transformations through long-term partnerships, creating measurable and sustainable impact.

Our value proposition is built on a structured innovation ecosystem: 3,600 Data & AI experts, proprietary solutions built on advanced models, and a research laboratory dedicated to both fundamental and applied innovation.

For more than 20 years, we have been translating technological innovation into competitive advantages across vital sectors: banking and financial services, energy, transport and mobility, luxury and retail, and healthcare.

About

Transvalor is a global provider of high-end simulation software for advanced manufacturing, supporting critical industrial processes such as metal forming, casting, heat treatment, and materials behavior. Founded in France in 1984, Transvalor combines deep scientific expertise with industrial robustness to deliver reliable, production-grade digital simulation platforms. Our solutions are used worldwide by leading industrial groups, research organizations, and universities to accelerate innovation, reduce risk, and improve manufacturing performance. Transvalor enables customers to deploy simulation across the entire manufacturing value chain, from R&D to industrialization. With an international footprint and long-term partnerships, we support strategic transformation toward digital and sustainable manufacturing.

About

WhiteLab Genomics, a pioneer in the accelerated development of genomic medicines, sits at the intersection of artificial intelligence and biology. Founded in 2019 and supported by Y-Combinator, the company is establishing itself as a key player in genomic medicine innovation. Its proprietary AI technology enables the analysis of complex biological data and the in-silico design of optimized therapeutic candidates, thus reducing development time, costs, and associated risks. WhiteLab collaborates with major pharmaceutical companies (such as Sanofi), leading academic institutions, and innovative biotech companies. WhiteLab is a member of the prestigious French Tech 2030 program and is part of the Bayer Co.Lab in Cambridge (USA).

WIREMIND

About

Founded in 2014 and headquartered in Paris, Wiremind offers advanced inventory, distribution, and optimization solutions for the passenger transportation, air cargo, and sports & events industries. By combining artificial and human intelligence, Wiremind's innovative tools empower clients to streamline operations, enhance forecasting, and drive measurable commercial performance. Trusted by industry leaders worldwide, Wiremind delivers data-driven insights and user-centric solutions that create tangible value across sectors, from managing air cargo capacity to optimizing ticket sales and forecasting passenger demand.

2CRSI

Contact

Alain Wilmouth | President & CEO
Email: aw@2crsi.com
www.2crsi.com

About

2CRSi is a French designer and manufacturer of high-performance servers for AI, HPC, and cloud infrastructures. Our mission is to maximize computing power while reducing energy consumption. We design AI-optimized architectures integrating NVIDIA GPUs and especially rely on single- and dual-phase liquid cooling. We position ourselves as a high-density AI infrastructure player, balancing performance, scalability, and energy efficiency as AI drives power and thermal demands in data centers.
