

# Meet the French Delegation

## France in Japan & South Korea in 2026

Tokyo | Japan | March 31 - April 1  
Seoul | South Korea | April 2 - April 3

# About Business France

Business France is the public consulting business serving the international development of the French economy.

Business France is the public consulting business serving the international development of the French economy. It is responsible for fostering export-led growth by French businesses, as well as promoting and facilitating foreign investment in France.

It promotes France's firms, business image and nationwide attractiveness as an investment location, and also runs the V.I.E program.

Business France has more than 1,400 personnel, both in France and in 53 countries throughout the world.

In 2024, support from Business France made it possible to generate €1.8 billion in additional export revenues for French SMEs and mid-size companies, accounting for more than 31,010 jobs created or planned. Business France supported 59% of the 1,878 foreign investment decisions in 2025, accounting for 74% of the 47,734 projected jobs

More info: <https://www.businessfrance.com>

# About Mission French Tech

Mission French Tech is the French government's dedicated administration for start-ups and scale-ups. It drives the development of France's innovation ecosystem and promotes French tech champions worldwide.

Created in 2013, Mission French Tech designs and implements public policies for start-ups, connects key ecosystem players, and positions France as one of the world's leading hubs for innovation. The "French Tech" label also refers to the broader ecosystem of start-ups, alongside investors, incubators, accelerators and corporate partners shaping France's tech economy. French Tech is supported by a unique international network, including 114 French tech hubs throughout France and in 52 countries.

## **A large-scale tech powerhouse...**

- 35 unicorns and 1 decacorns, 18,000 active start-ups
- French Tech Next40/120 features France's fastest-growing start-ups and scale-ups
- France #1 hub for gen AI in Europe and #3 worldwide
- France #1 tech ecosystem in Europe

## **...delivering world-first innovations.**

- France stands out for the diversity of its tech sectors. Beyond software, the ecosystem is strongly positioned in AI, deeptech, greentech, health and industrial tech.
- A proven ability to deliver frontier breakthroughs: from robots navigating inside the human brain, to satellite-to-satellite docking technologies, and infrastructure enabling telecommunications in the most remote regions.
- 100,000 AI specialists/year trained in world-class research institutions and engineering schools

More info: <https://lafrenchtech.gouv.fr/en/>

# About France 2030

France 2030 is the French government's major investment plan designed to accelerate innovation, industrial transformation, and ecological transition.

It aims to build the France of tomorrow by supporting strategic sectors and developing future global champions.

Created in 2021, France 2030 mobilizes €54 billion to support companies, universities, and research institutions in addressing major global challenges such as climate change, technological competition, and economic sovereignty.

The plan focuses equally on:

- Decarbonizing the economy (50%)
- Supporting emerging innovative players (50%)

It covers the entire innovation chain, from research to industrial production, reinforcing France's position as a global innovation leader.

A large-scale investment strategy...

- €54 billion invested in innovation and reindustrialization
- Over 2,000 projects already supported across France
- Focus on strategic sectors: energy, mobility, health, digital, space
- Strong ambition to create future industrial and tech champions

Key objectives

- Become a leader in green hydrogen
- Decarbonize industry
- Produce 2 million electric & hybrid vehicles
- Develop the first low-carbon aircraft
- Invest in biomedicine and health innovation
- Strengthen food sustainability
- Advance space and deep-sea exploration

# About SGPI

**RÉPUBLIQUE  
FRANÇAISE**

*Liberté  
Égalité  
Fraternité*

The General Secretariat for Investment (SGPI) is a French government body placed under the direct authority of the Prime Minister. Its core mission is to ensure the coherence, strategic direction and monitoring of the State's investment policy, notably through the deployment of France 2030 and the Future Investment Programmes (PIA).

France 2030 is a €54 billion national investment plan designed to accelerate innovation, reindustrialisation and the ecological transition by supporting strategic sectors and high-impact projects across the value chain.

Created in 2010 (initially as the “Commissariat général à l’investissement”) and renamed SGPI in 2017, the Secretariat plays a central role in steering major public investment priorities. It also contributes to the socio-economic assessment of large-scale public investment projects.

More info: <https://www.info.gouv.fr/organisation/secretariat-general-pour-l-investissement-sgpi>

# Allegria

## Contact

**Jean-Pierre Ferrand** | CEO & Founder

Email: [jp.ferrand@allegria.fr](mailto:jp.ferrand@allegria.fr)

<https://chateau-merveilles.paris/>

# ALLEGRIA

THE FRENCH POWER OF JOY

## About

For 30 years, ALLEGRIA has been designing and producing events which celebrate the French art of living. Today, Allegria is creating something unprecedented - the first ever immersive dinner show for 1,000 to 1,500 guests: "CHÂTEAU MERVEILLES".

A unique immersive experience, which takes guests on a technological and emotional odyssey that showcases the diversity and richness of French craftsmanship and the heritage of art de vivre. Our ambition is simple: to create a sense of wonder for guests by immersing them in the incredible diversity of France's excellence in culture and artisanal heritage.

Thanks to 360° artistic immersive projection, guests find themselves at the heart of France's most beautiful monuments, architecture and inside the mesmerising worlds of watchmaking, haute couture, tableware, jewellery and crystal.

A unique immersive show supported by the French government "France 2030"

# Alta Ares

## Contact

**Victoire Solly** | Chief of Staff

Email: [victoire.solly@altaares.com](mailto:victoire.solly@altaares.com)

<https://www.altaares.com/>

## About

Alta Ares builds AI enabled interception systems (autonomous interceptor drones plus detection/command software) designed for real operational constraints. The founder Hadrien, FR part Ukrainian, dropped everything at the start of the war to go to Kyiv and the team iterated with Ukrainian troops under live Shahed threat, turning frontline lessons into product.

# Aniah

## Contact

Vincent Bligny | CEO  
Email: v.bligny@aniah.fr  
www.aniah.fr

## About

Aniah transforms chip design with an AI-powered formal circuit checker: it builds failures models of billion-devices designs and helps engineers solve design bugs instantly. Quality is enforced continuously, which results in consistent time-to-market achievement.

## About

Adopt AI is Europe's biggest business & innovation summit for large-scale AI adoption, organized by Artefact. Positioned as the "Davos of AI" and the business sequel to the AI Action Summit, it gathers 20,000 global C-level executives (including 1,000+ CEOs), decision-makers, government representatives, and entrepreneurs to convert AI potential into tangible economic impact.

The summit bridges the gap between high-level regulation and real-world execution through executive sessions and concrete use cases. Our mission is to provide a key platform for international stakeholders to network, create value, share their visions & display concrete solutions for the future of AI.

Filigran, founded in 2022, stands out in the cybersecurity landscape with its unique open-source, threat-informed approach to Continuous Threat Exposure Management (CTEM). Our AI-powered XTM suite operationalizes threat intelligence, highlights what matters most, and continuously strengthens security posture. Filigran solutions are trusted by more than 6,000 public and private organizations worldwide.

# GENOMINES

EFFICIENT PLANT-BASED MINING

# Génomines

## Contact

**Fabien Koutchekian** | Co-founder & CEO

Email: [fabien.koutchekian@genomines.com](mailto:fabien.koutchekian@genomines.com)

<https://www.genomines.com/>

## About

Genomines transforms plants into natural metal extractors, creating a clean, scalable, and cost-competitive alternative to mining. Using genetically enhanced nickel hyperaccumulator plants, we will extract up to 2.5 tons of nickel per hectare from low-grade soils, without the excavation, tailings, or ecosystem damage of conventional mining. Our process integrates biotechnology (genetic enhancement, microbiome engineering), agriculture, and thermal processing to produce nickel bioconcentrate compatible with existing refining infrastructure. This plant-based approach is carbon neutral, accelerates supply development from 18 years to under 3, and unlocks millions of hectares of underutilized land as a new source of critical minerals.

By replacing conventional laterite nickel mining with plant-based extraction, Genomines cuts emissions by 19–59 tons of CO<sub>2</sub> per ton of nickel. Our decentralized, agricultural model can deploy within 1–3 years instead of the 18-year average of conventional nickel mining, diversifying supply chains beyond Indonesia and reducing geopolitical dependency. Economically, Genomines will produce nickel at first-quartile industry costs, enabling cleaner, cheaper, and faster access to critical minerals for the energy transition.

# Geomatys

## Contact

**Vincent Heurteaux** | CEO

Email: [Vincent.heurteaux@geomatys.com](mailto:Vincent.heurteaux@geomatys.com)

<https://www.geomatys.com/>

## About

Geomatys is a French sovereign geospatial software company, member of the OGC, with over 20 years of experience in the Space and Defence sectors. We work with leading space agencies (CNES, ESA, RESTEC/JAXA) and major European defence contractors (Airbus DS, Thales, Naval Group). Our software suite **Examind** covers geographic, hydrographic, oceanographic and meteorological domains, and is deployed in both civilian and defence operational environments. We also deliver geospatial datalakes, metadata cataloguing and on-the-fly satellite data processing, all OGC-compliant to ensure maximum interoperability.

## Glimps

### Contact

**Cyrille Vignon** | CEO

Email: [cyrille.vignon@glimps.re](mailto:cyrille.vignon@glimps.re)

<https://www.glimps.re/en/>

## About

GLIMPS is a cybersecurity vendor specializing in advanced malware detection and unknown threat identification. Its platform relies on proprietary AI engines developed in-house, including code conceptualization and the PowerSheLLM model, enabling the analysis of any file type in 3 to 5 seconds. GLIMPS secures Microsoft 365 emails, business applications, data flows, and critical infrastructures, with agentless deployment and minimal performance impact. The solution supports high-volume file scanning, processing up to 500,000 files per day. Available as SaaS, on-premise, or air-gapped, it ensures full data confidentiality and is trusted by both civilian organizations and defense environments.

# Groupe Altair

## Contact

## About

Qubit Pharma is redefining the boundaries of drug discovery by bridging the gap between high-performance computing, quantum and AI. Our platform, Atlas, leverages ultra-high-resolution molecular dynamics and hybrid classical-quantum algorithms to model complex molecular interactions with unprecedented physical accuracy.

Unlike traditional AI methods that rely on existing data, we simulate the laws of physics to discover "undruggable" pockets and optimize lead compounds in record time. We provide pharmaceutical leaders with a decisive "predictive edge," significantly reducing R&D costs.

## About

Quobly is a french quantum computing startup developping semi-conductor based quantum chips.

# REGOM

## Contact

**Arthur Wagner** | CEO

Email: [a.wagner@regom.fr](mailto:a.wagner@regom.fr)

<https://www.regommachinery.com/>

## About

REGOM provides advanced solutions for the tire recycling industry, focusing on the identification, tracking, and automated sorting of used tires. Our systems can process up to 1,400 tires per hour, sorting them accurately by brand, model, dimensions, and remaining tread depth. By helping tire collectors, recyclers, and manufacturers handle large volumes efficiently, REGOM reduces manual labor, improves accuracy, and supports a more sustainable and circular approach to tire reuse and recycling.

## About

Since 1920, at SELA, we have been designing, developing and manufacturing innovative lighting and control systems.

Our guiding principle ? Connecting the designer to the users, to meet their needs and anticipate their future expectations. As a French family business, we are committed above all to establishing solid relationships of trust with our customers and placing the user experience at the heart of our developments.

[www.thrustme.fr](http://www.thrustme.fr)

## About

ThrustMe is a pioneering deep-tech company in the space industry, transforming satellite manoeuvrability through innovative, industrialised in-orbit electric propulsion systems.

As the world's first to demonstrate iodine-fuelled propulsion in orbit, ThrustMe has redefined efficiency, sustainability, and reliability for satellite constellations, enabling satellites to move with purpose.

Today, with hundreds of systems launched and a new generation of products in development, ThrustMe is a trusted global partner driving the industrial era of space, where innovation meets production excellence.

“We are not just propelling satellites, we are propelling the Industrial Space Era forward.”

# Verkor

## About

Founded in July 2020, Verkor is a European industrial company committed to accelerating the production of low carbon batteries in France and Europe. Supported by a solid network of financial and industrial partners, it addresses the fast growing demand for electric vehicles, new mobility solutions, and stationary storage. Its business model, built on agility and sustainability, attracts talented teams united around a shared ambition: building a European battery value chain.

In 2023, Verkor inaugurated the VIC (Verkor Innovation Centre) and its fully digital 5.0 pilot line, a model of excellence, competitiveness, and optimized resource use, now integrated into the Dunkirk Gigafactory. Operational today, this first Gigafactory will produce and commercialize its initial battery cells in 2026.

**Jean-François Reaud** | Président

Email: [jfr@vignoblesgabriel.com](mailto:jfr@vignoblesgabriel.com)

[www.vignoblesgabriel.com](http://www.vignoblesgabriel.com)

## About

Vignobles Gabriel & Co is a collective of 30 independent winegrowers located on the Right Bank of Bordeaux. Founded on the family vineyards of Gabriel Bruneteau in 1904 and developed into a collective by Jean-François Réaud in the late 1990s, the company brings together producers who share a common vision of quality, fairness and environmental responsibility.

The collective operates through a hybrid model combining cooperative collaboration, wine trading and independent estates. This structure allows the growers to maintain their identity while benefiting from shared resources, technical support and international distribution.

Committed to sustainable viticulture, Vignobles Gabriel & Co promotes organic and biodynamic practices and guarantees fair remuneration for its partner growers. Certified Fair For Life, the collective aims to offer authentic Bordeaux wines produced with respect for people, terroirs and the environment.

## | About

Wandercraft is a deep tech company pioneering AI-powered robotics to enhance human mobility and transform industrial operations. Founded in 2012, the company developed Atalante X, the world's first self-balancing medical exoskeleton, now deployed in over 100 rehabilitation centers across four continents. Wandercraft is also building Eve, the first personal self-balancing exoskeleton for home use, and Calvin-40, an industrial humanoid robot created in partnership with Renault Group. With 30+ patents, FDA clearance, and \$75M raised in Series D, Wandercraft leads European humanoid robotics, bridging healthcare innovation with industrial automation.

# About NTT DATA

NTT DATA is a \$30+ billion business and technology services leader, serving 75% of the Fortune Global 100. We are committed to accelerating client success and positively impacting society through responsible innovation. We are one of the world's leading AI and digital infrastructure providers, with unmatched capabilities in enterprise-scale AI, cloud, security, connectivity, data centers and application services. Our consulting and industry solutions help organizations and society move confidently and sustainably into the digital future. As a Global Top Employer, we have experts in more than 50 countries. We also offer clients access to a robust ecosystem of innovation centers as well as established and start-up partners. NTT DATA is part of NTT Group, which invests over \$3 billion each year in R&D.

# About UBIGI

Ubigi is a travel-focused connectivity brand specialising in international mobile services via eSIM.

Launched in 2017, it has quickly established itself as a leading player in the travel tech space, helping travellers stay connected with a seamless, digital-first experience.

Ubigi offers 4G/5G data plans across more than 200 destinations, enabling users to get online wherever they are—without the hassle and cost of roaming, and without relying on public Wi-Fi networks. Whether for business travel or personal trips, Ubigi makes it easy to keep working, sharing and communicating securely while on the move.

With eSIM, connectivity becomes simple: no physical SIM card to swap, no store visits, and no last-minute scrambling at the airport. Ubigi’s approach is designed for modern travellers who want reliable data, fast activation, and peace of mind—so they can focus on their trip, not on their network.
