Business environment

FRANCE, A BUSINESS-FRIENDLY ENVIRONMENT

#2

Country in the European Union by GDP in 2024
(Eurostat, 2026)

#1

Country in Europe for foreign investment since 2019
(EY Attractiveness Survey, 2026)

#5

European country with the most manufacturing businesses in 2023
(Eurostat, 2026)

#4

European country for exports in 2025
(WTO, 2026)

17,800

Businesses benefited from public funding in France in 2022
(Eurostat, 2026)

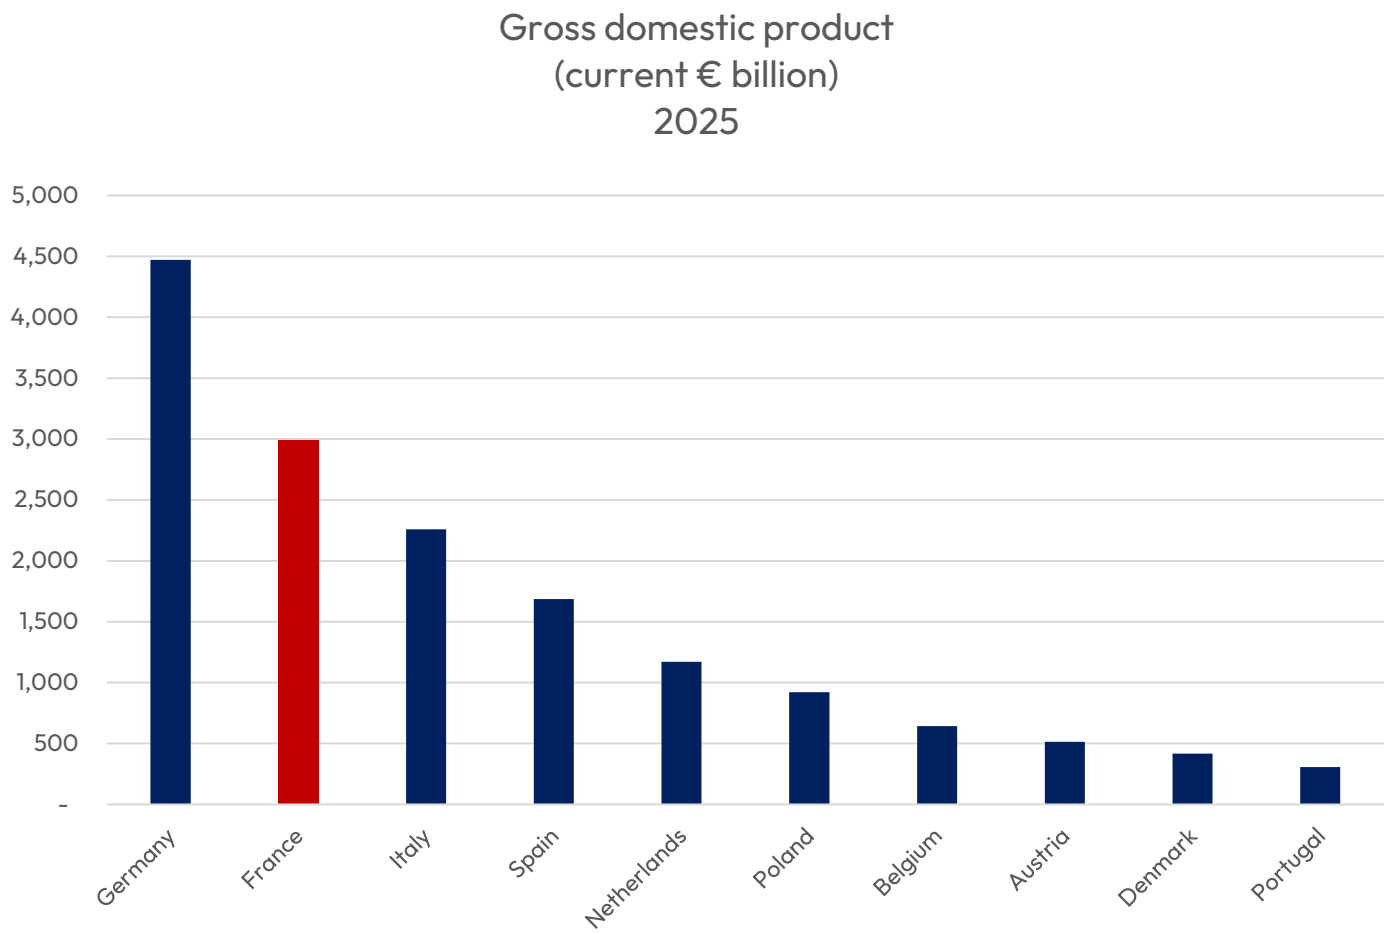

5

French banks in the European Top 10 in terms of assets in 2025
(S&P Global Market Intelligence, 2026)

France, the second largest GDP in the European Union

Available at: Welcome.BusinessFrance

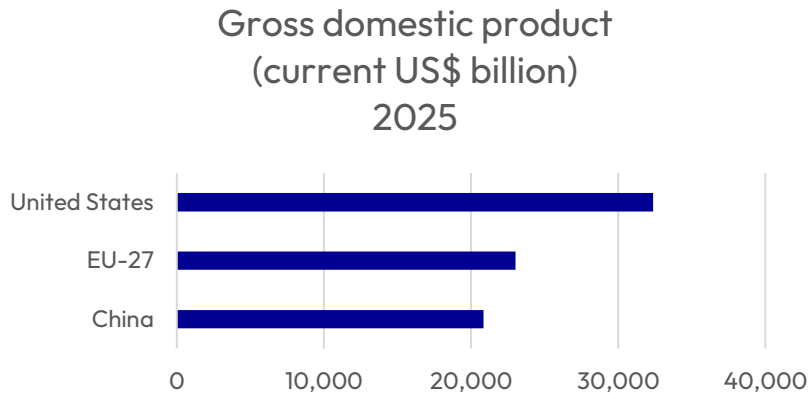

#2

Country in the European Union by GDP in 2025, according to Eurostat.

+0.8%

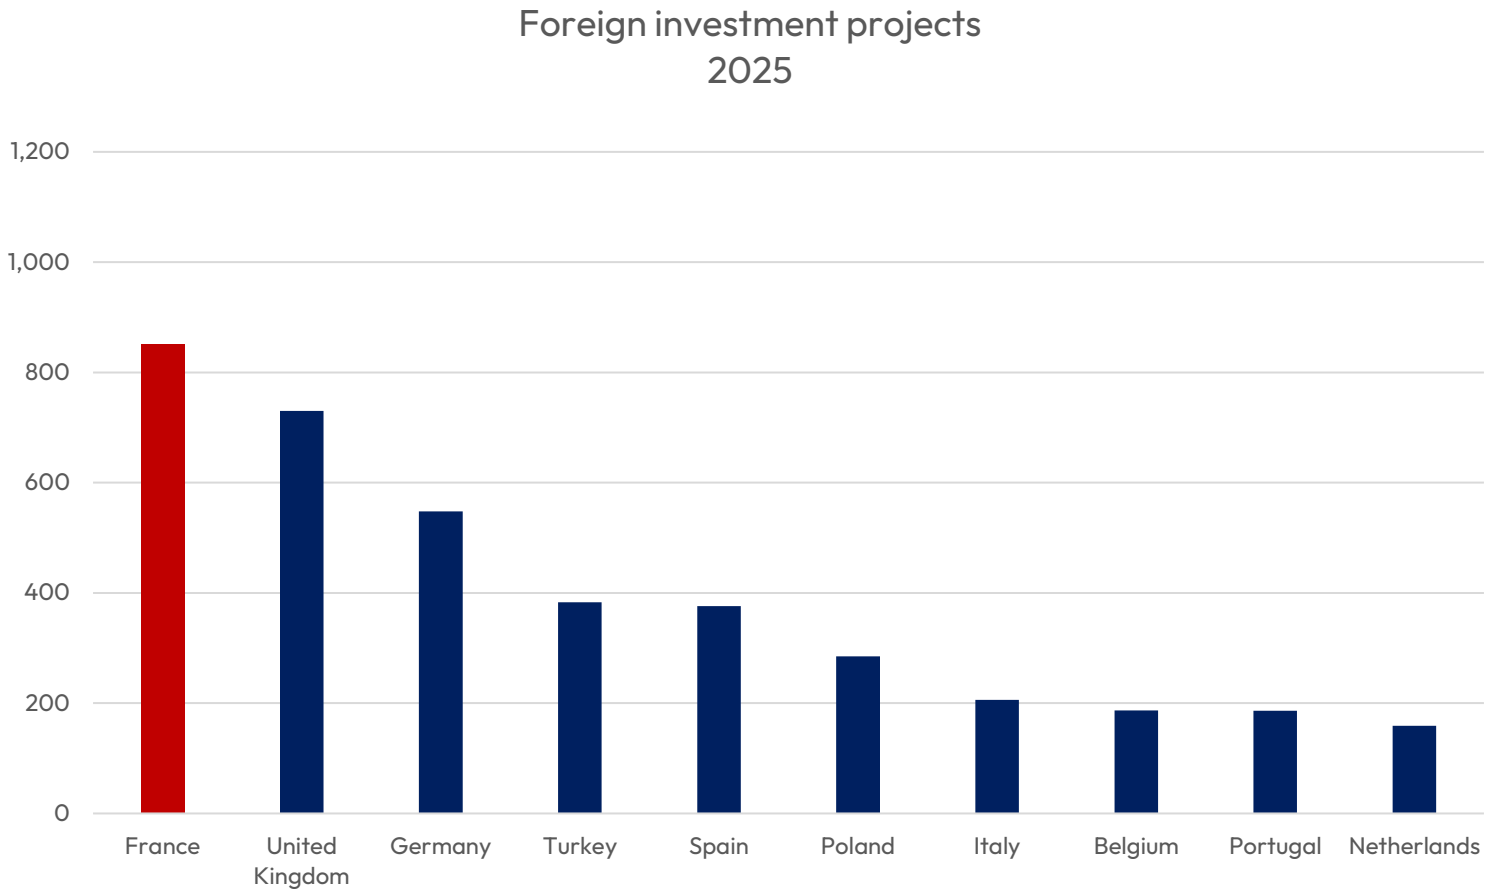

The growth rate of France's GDP in 2025. According to forecasts, it should be higher than in Germany (+0.2%).

France, a key European financial center

5

The number of French banks in the European Top 10 in terms of assets.

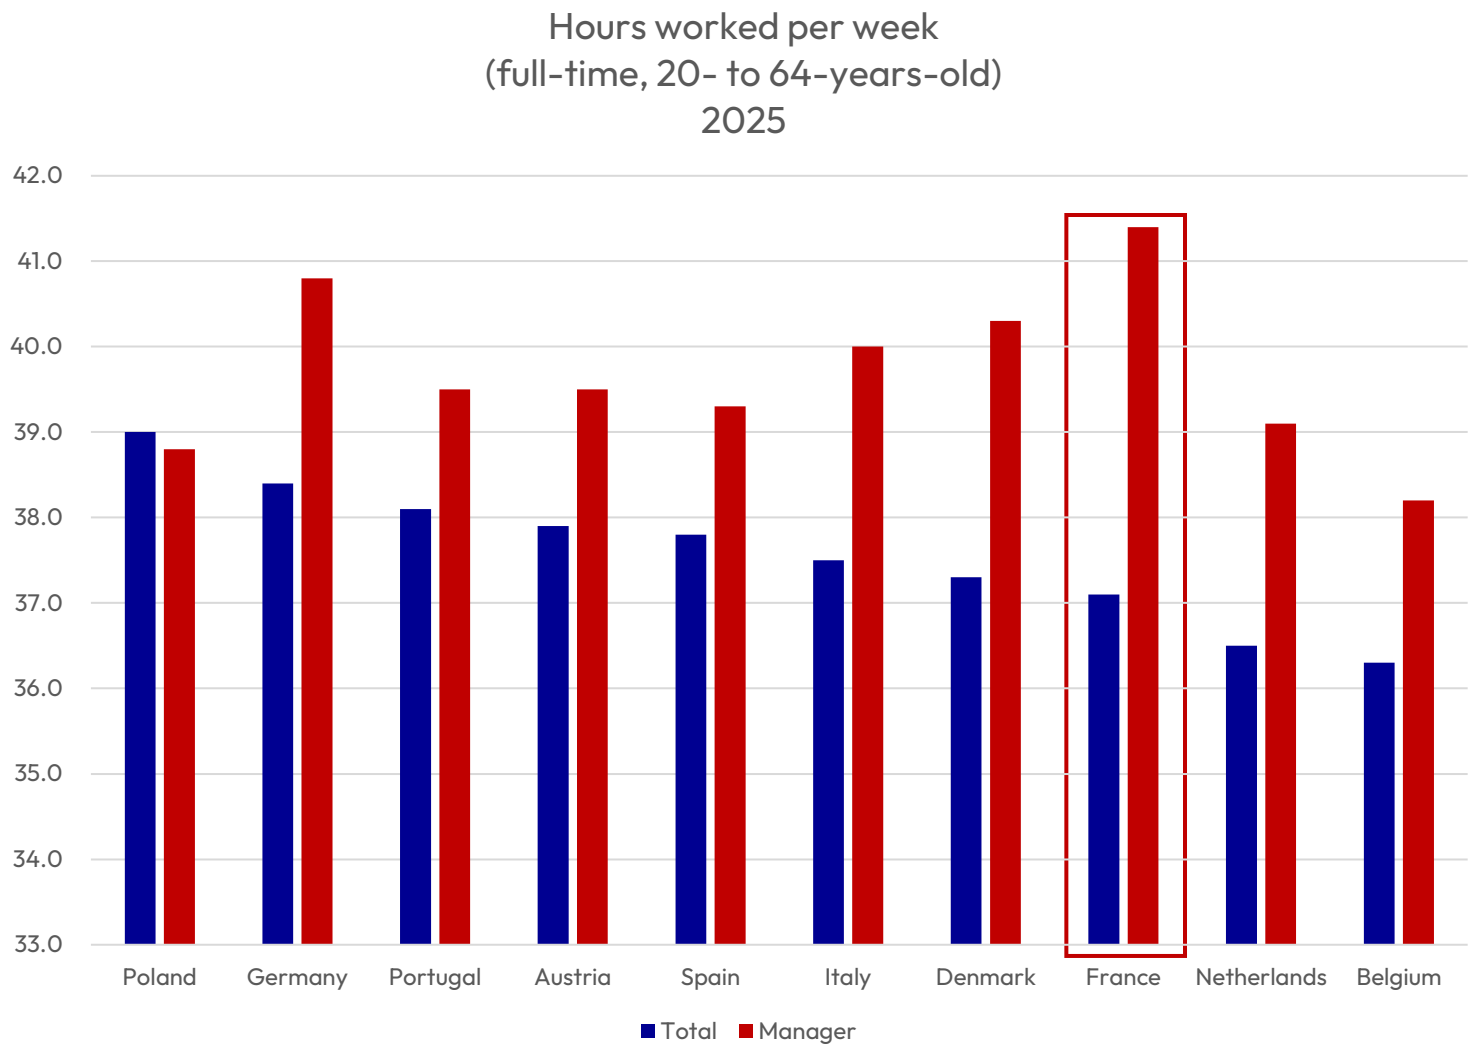

€7.4 billion

Raised in fundraising rounds by French Tech businesses, via 618 operations in 2025.

Key: **"La French Tech"** is a public initiative launched by the French government in 2013 to support and promote the French startup ecosystem, in France and internationally.

Source: S&P Global Market Intelligence, 2026; EY, 2025

Long weekly working hours, especially for managers

37.1 hours

Are carried out on average per week by active people working full-time in France in 2025.

41.4 hours

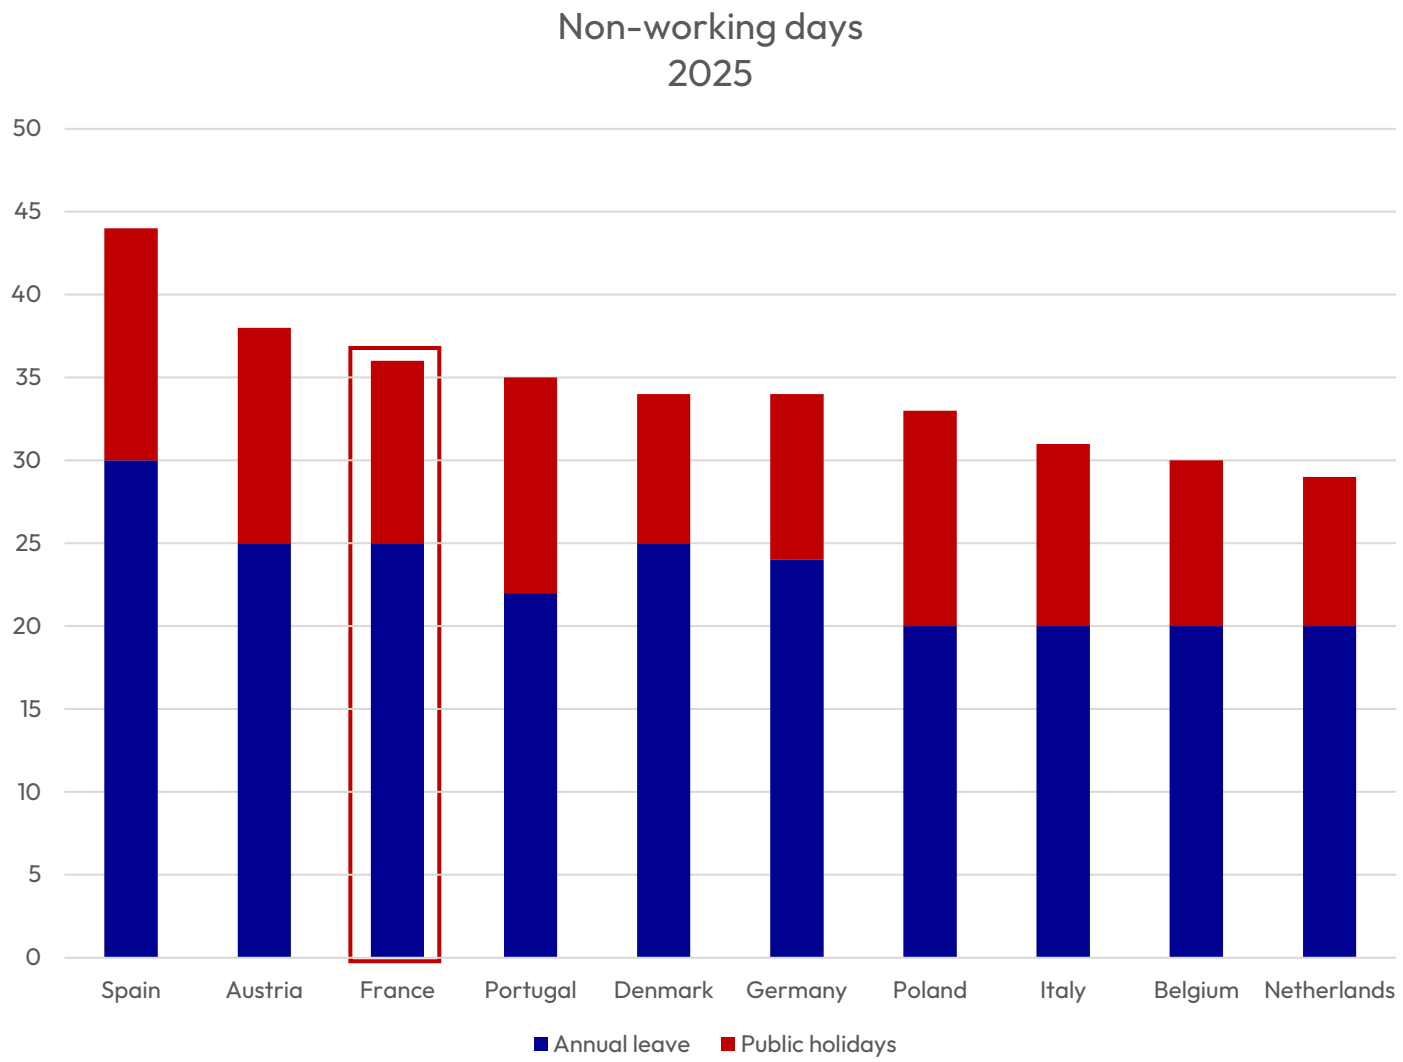

Completed per week by managers, making it the second-leading European country where managers work the most.

46%

The proportion of employees subject to at least one atypical work schedule during the month, i.e. outside the framework of the standard week.

Source: Eurostat, 2026; INSEE, 2026

Annual leave and public holidays in line with the European average

25 days of annual leave

French employees are granted a minimum of 25 days, slightly more than the European average (22).

11 public holidays

Granted to French employees, which is less than the European average (12).

62 days

Not worked due to strikes per 1,000 workers in France in 2024.

02

Labor costs and taxation

LABOR COSTS, HIGH PRODUCTIVITY AND LOWER TAXES

€44

Hourly labor costs in France in 2025
(Eurostat, 2026)

#10

Country in the world in terms of productivity in 2024
(OECD, 2026)

-8 percentage points

For the share of employer social security contributions in the financing of social protection between 2000 and 2019
(Eurostat, 2026)

-21%

Production tax reduction per year between 2019 and 2023, which mainly benefited industry
(Ministry for the Economy, 2025)

24%

Average corporate tax rate in France in 2023
(OECD, 2026)

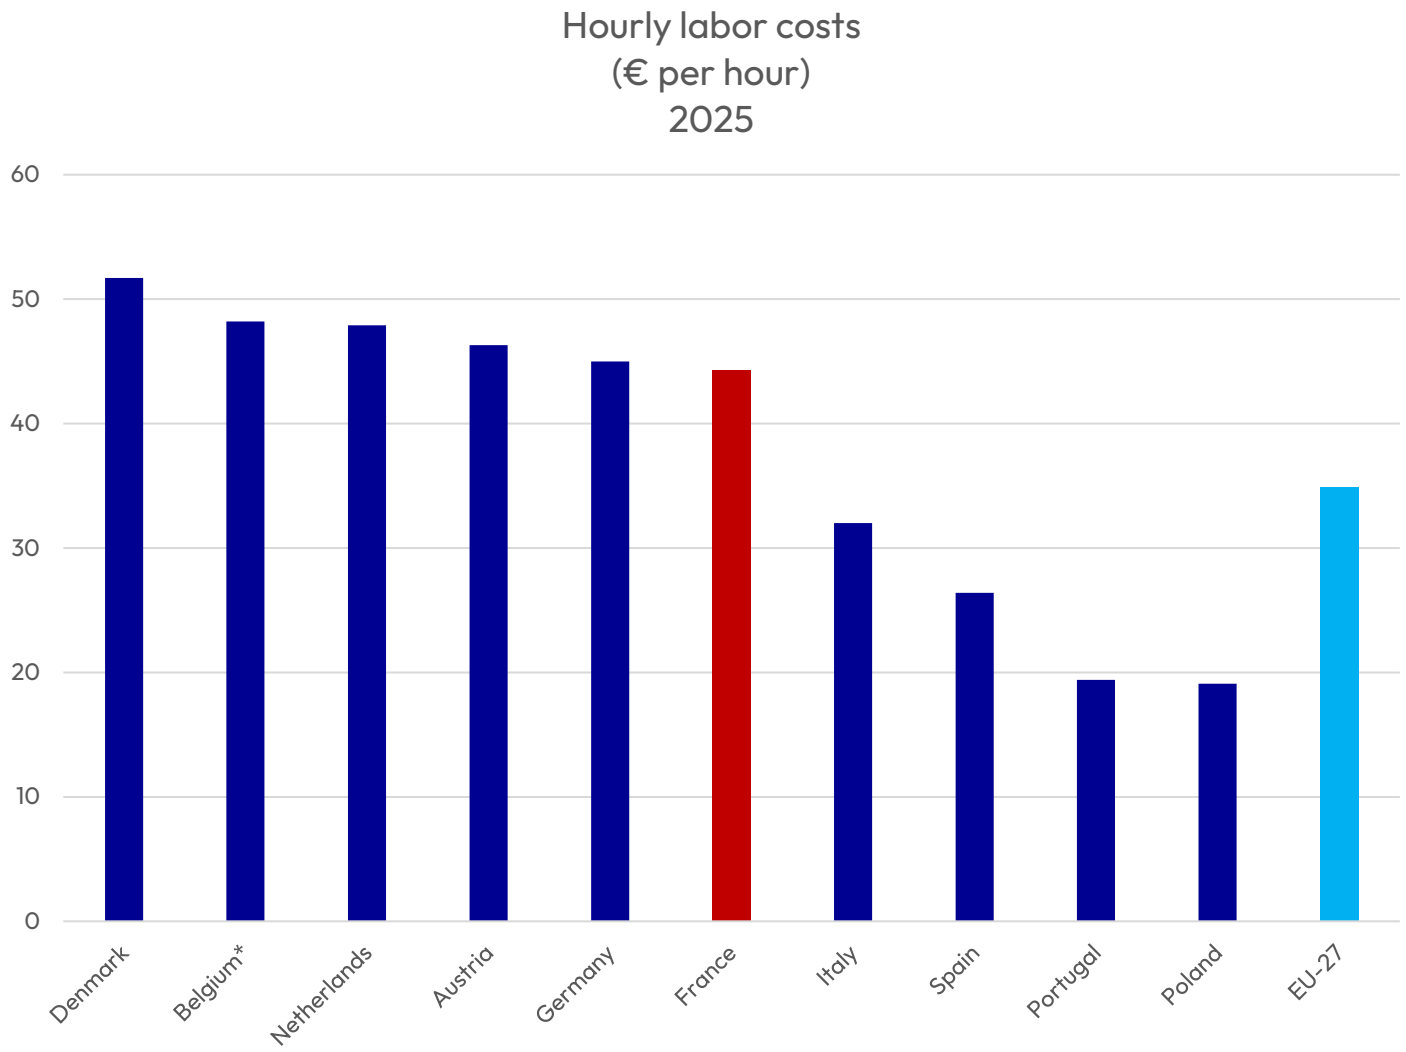

-8 percentage points

On corporate tax between 2018 and 2023
(OECD, 2026)

Labor costs in line with the major economies

Available at:
Welcome.BusinessFrance

€44.30

Hourly labor costs in France in 2025.

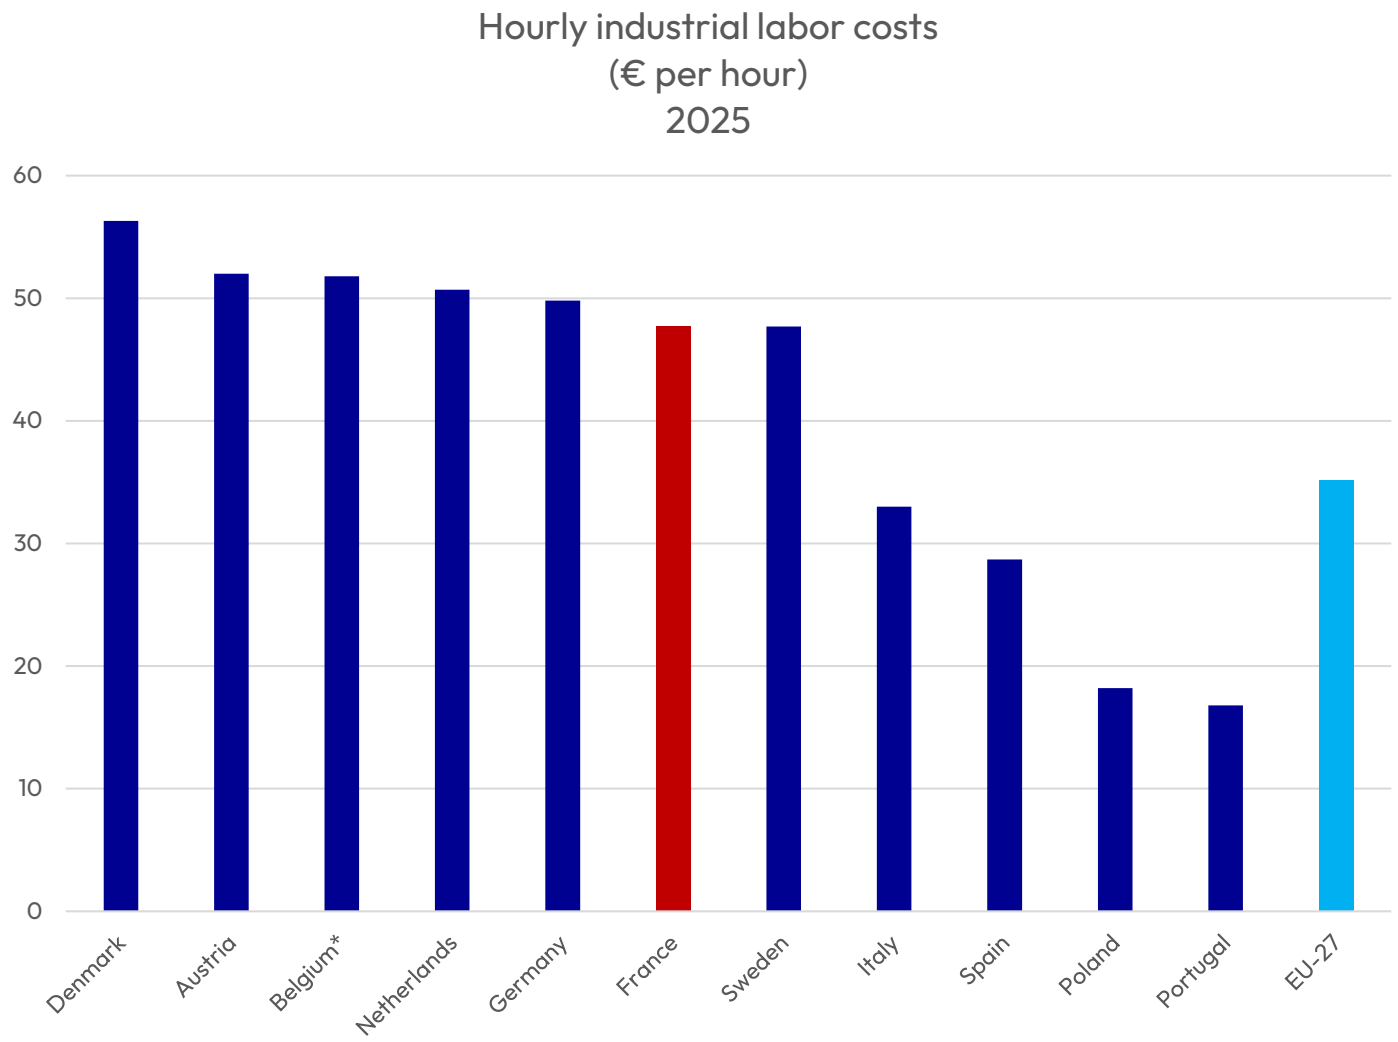

31%

Proportion of the hourly cost that corresponded to employers' contributions in 2025.

French labor costs have increased less in recent years than the European average (+13%, compared with +21% between 2021 and 2025).

Source: Eurostat, 2026; INSEE, 2026

An industrial workforce in line with the major economies

€47.70

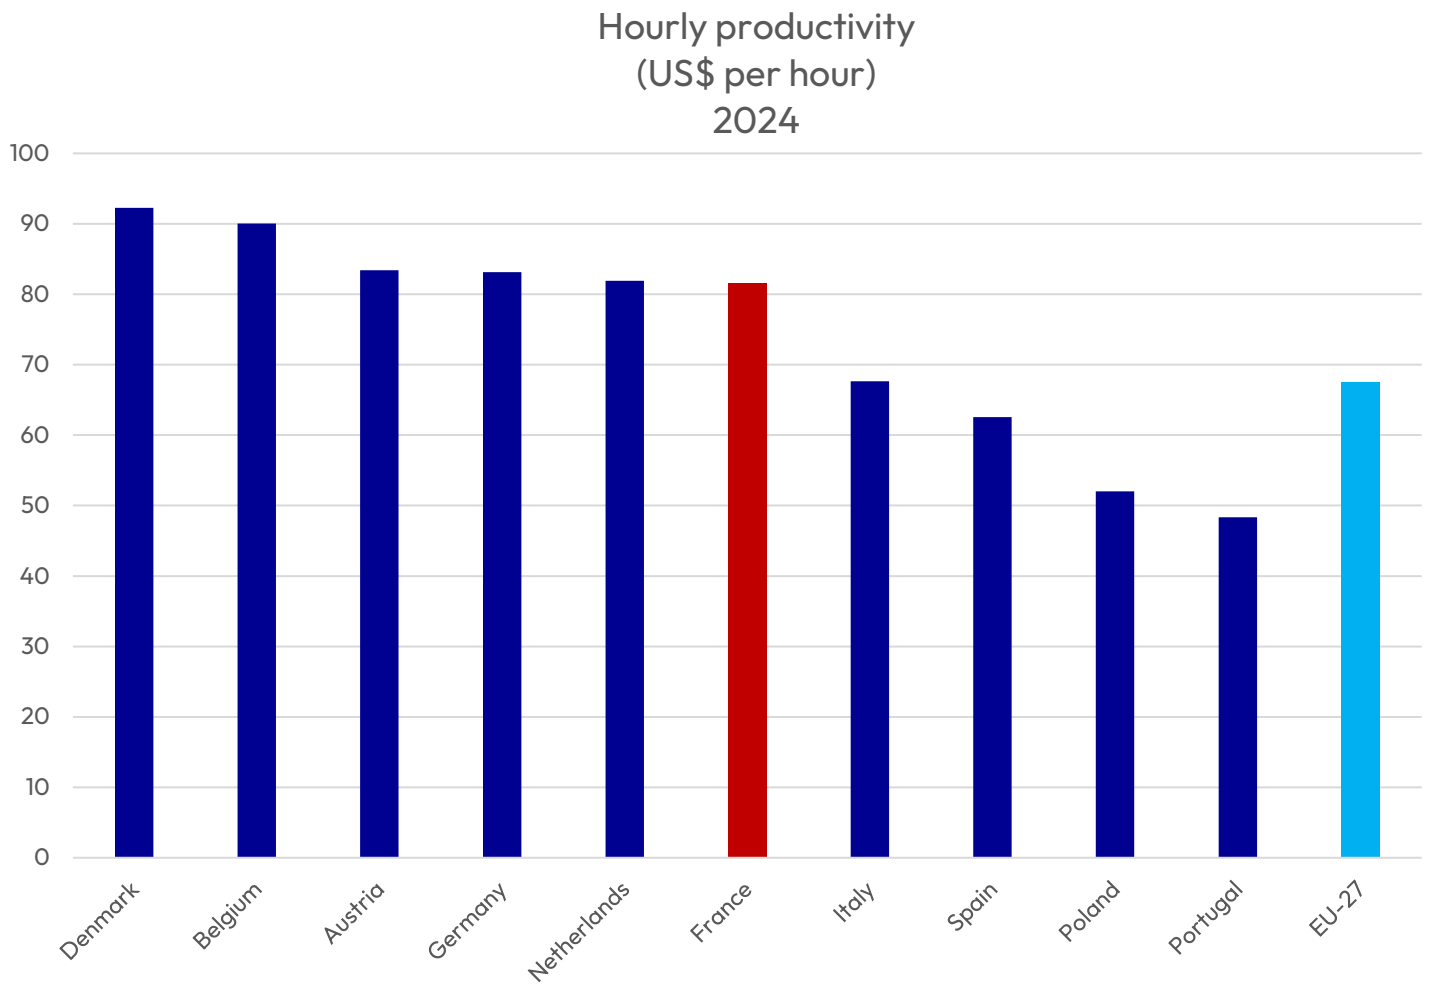

Hourly industrial labor costs in France in 2025.

French industrial labor costs have increased less than the European average in recent years (+14%, compared with +21% between 2021 and 2025).

Source: Eurostat, 2026

One of the highest hourly labor productivity rates in the world

Available at:
Welcome.BusinessFrance

US$82.60

Generated per hour by French labor on average.

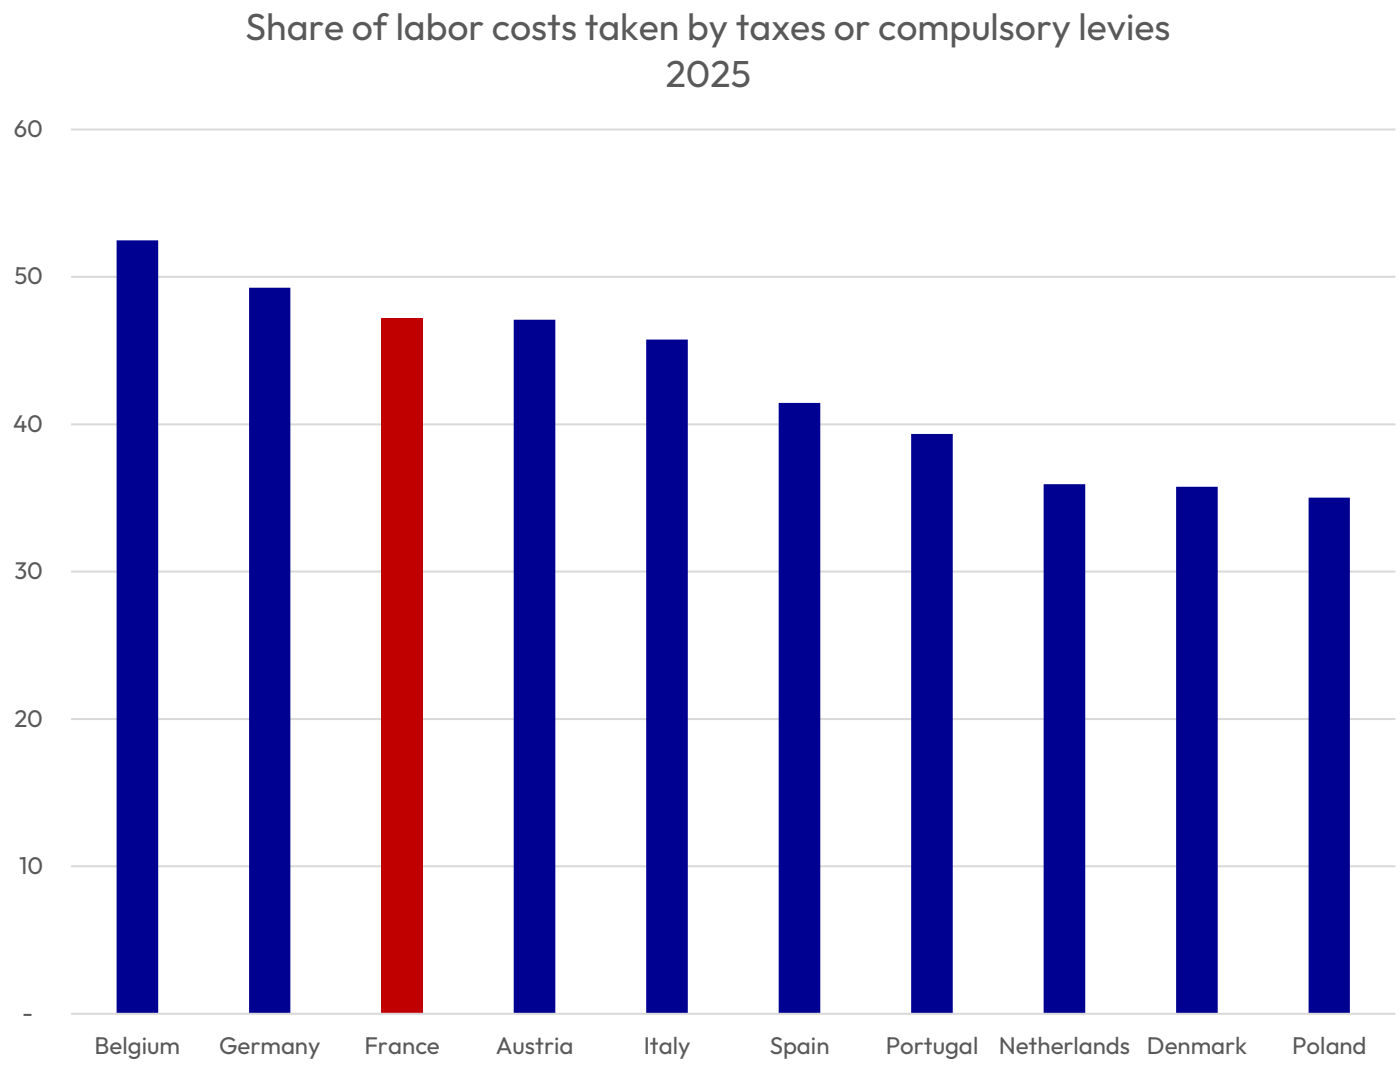

#12

Most productive country in the world.

* 2023

Source: OECD, 2026

A tax wedge financing complete coverage

47%

Labor costs in France taken by taxes or compulsory levies in 2025.

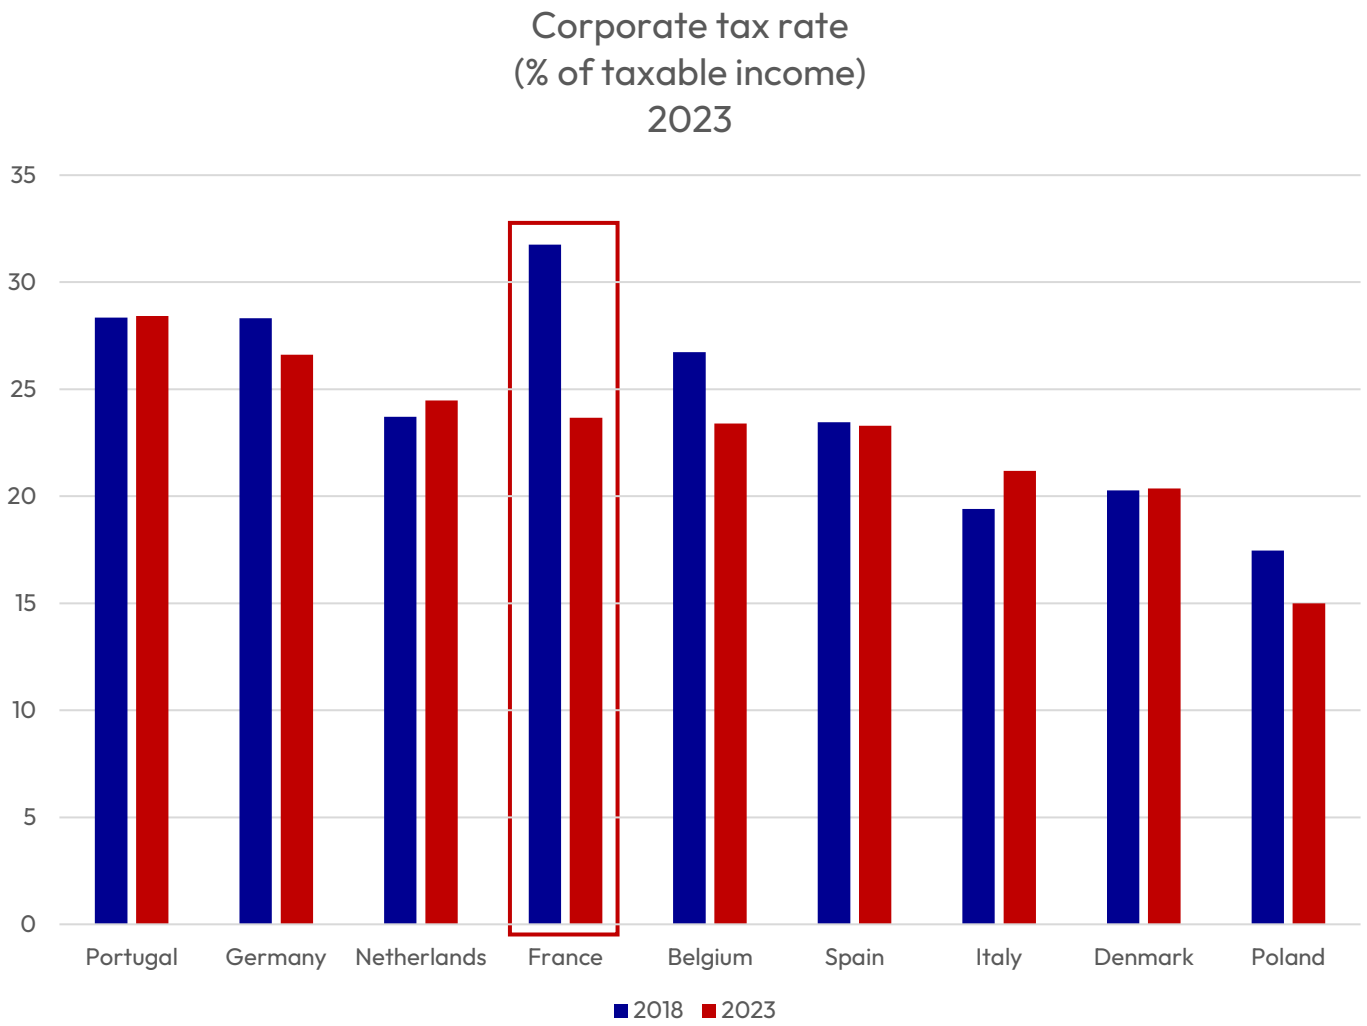

-1.3 percentage points

Over the last 10 years, while the OECD average has remained similar (-0.2 p.p.).

Source: OECD, 2026

Sharp fall in corporate taxes

Available at:
Welcome.BusinessFrance

23.7%

The amount of taxable corporate income that was levied by tax in France in 2023 on average.

-8 percentage points

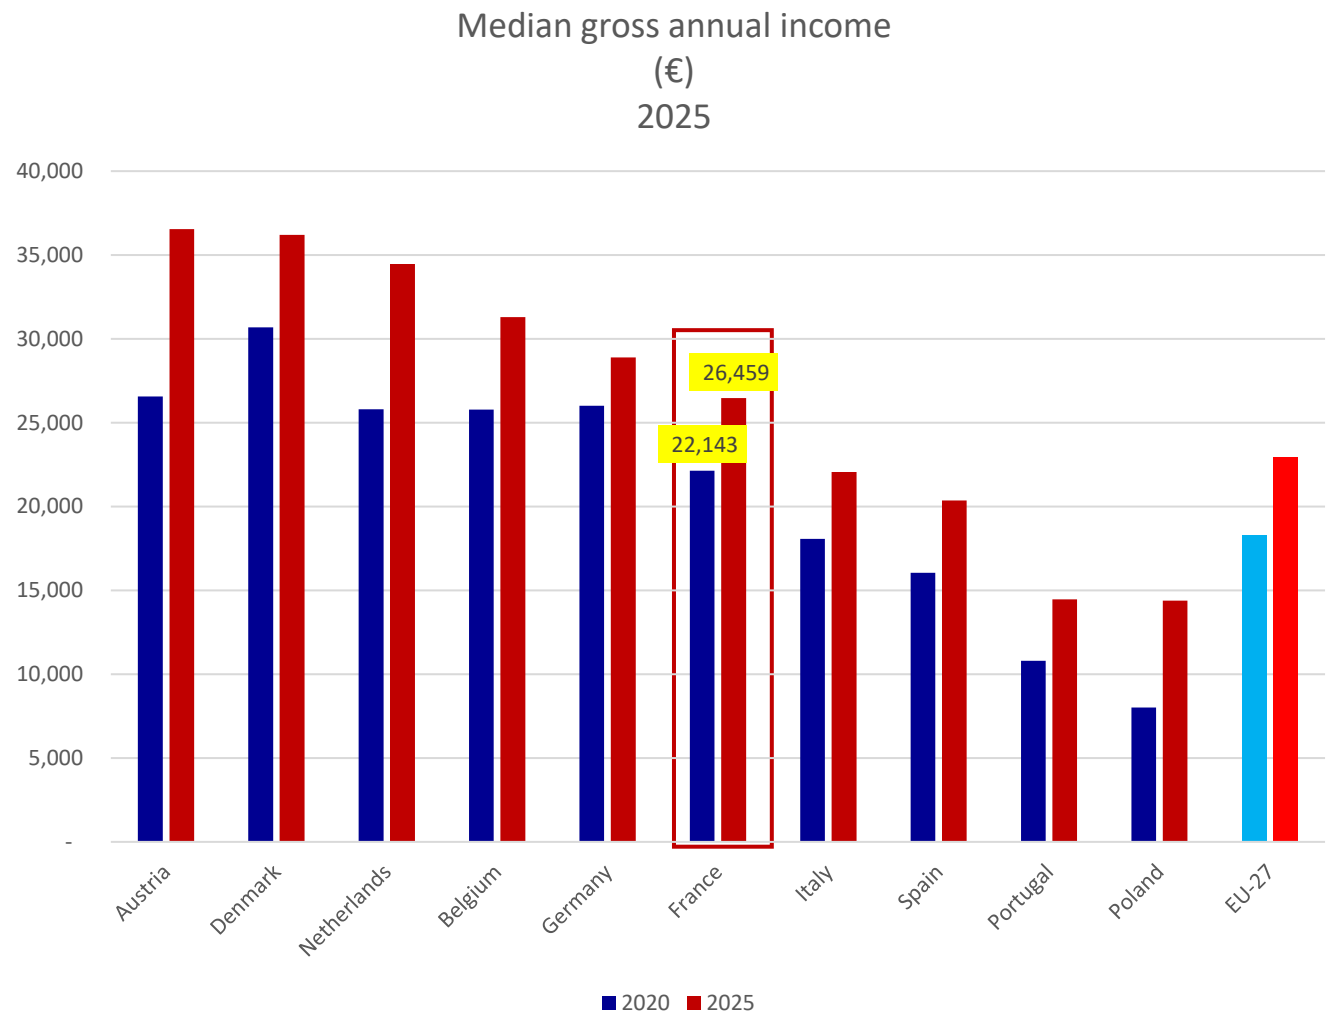

Between 2018 and 2023, thanks to policies adapted to promote the competitiveness of businesses established in France.

10%

This is the reduced tax rate that businesses can benefit from on income from certain intellectual property assets.

Source: OECD, 2026

Income comparable to that in the most productive countries

Available at:
Welcome.BusinessFrance

€26,459

The median gross annual income in France in 2025.

+19%

Between 2020 and 2025, lower than the average growth among EU countries (+25%).

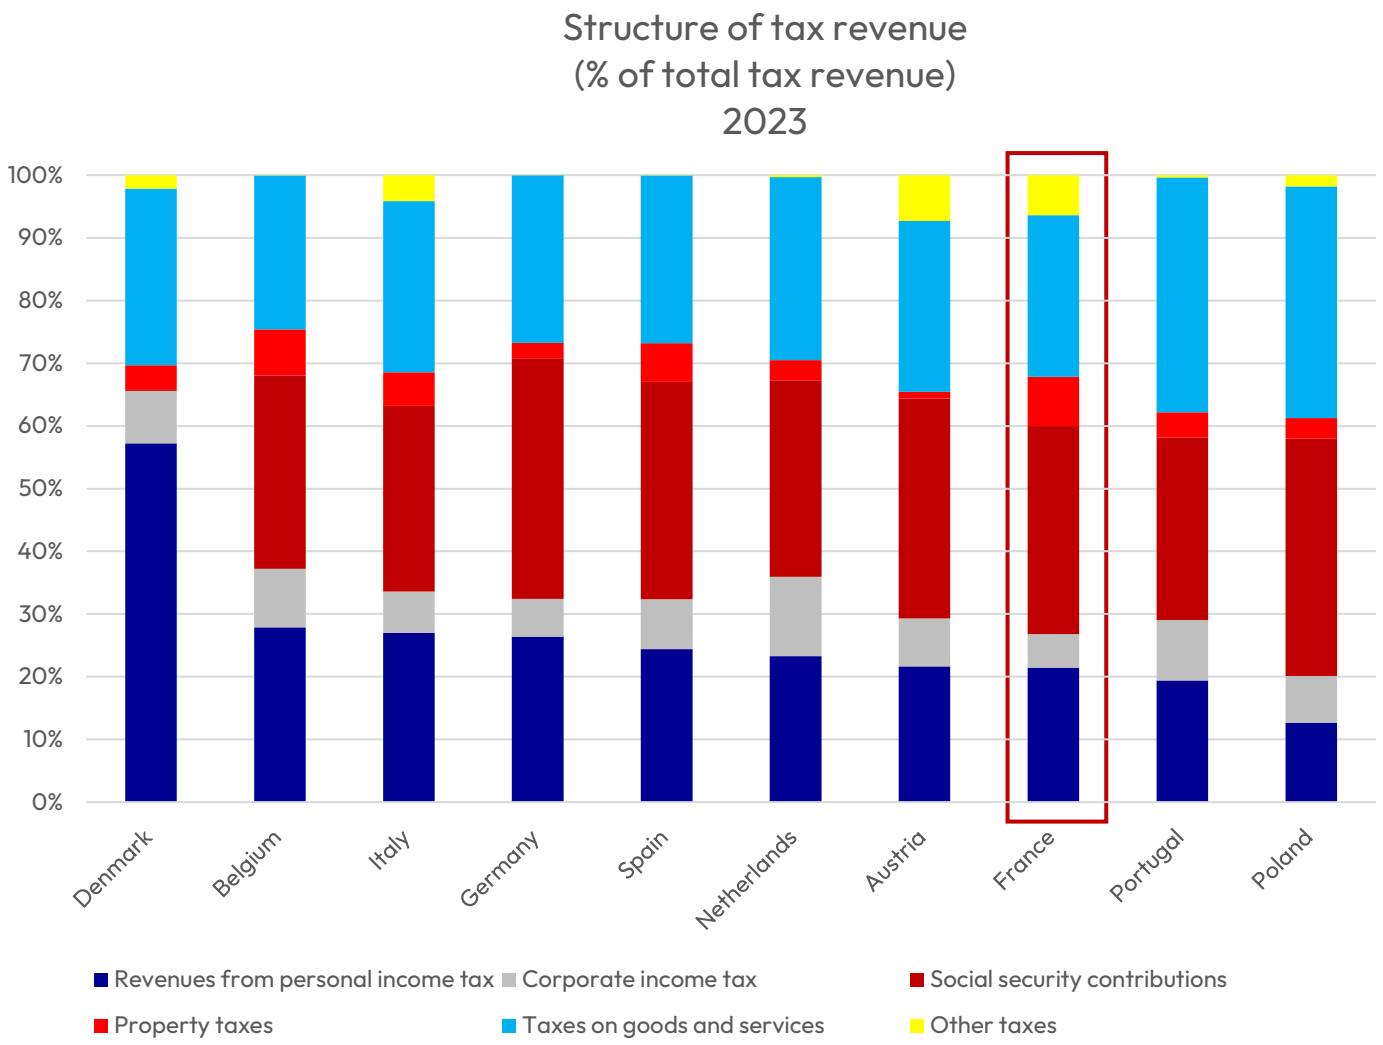

€22,404.20

The annual minimum wage in France in 2025.

* 2024

Source: Eurostat, 2026; Service-Public, 2026

Multiple sources of tax revenue

33%

Tax receipts that come from social security contributions, the largest source of revenue ahead of taxes on goods and services (26%), personal income tax (21%), property taxes (8%), corporate income tax (5%) and other miscellaneous taxes (6%).

03

Research and innovation

FRANCE, LAND OF INNOVATION

#2

Country in Europe for R&D spending

(OECD, 2026)

#2

Country for patent applications filed under the international PCT (Patent Cooperation Treaty) procedure in 2025

(WIPO, 2026)

#1

European recipient of foreign investments in R&D since 2019

(EY survey, 2026)

59%

Of the active population with a higher education diploma or in a position with a high level of qualification

(Eurostat, 2026)

30%

The research tax credit rate for R&D expenditure up to €100 million

(Ministry for the Economy, Finances and Industrial Sovereignty, 2024)

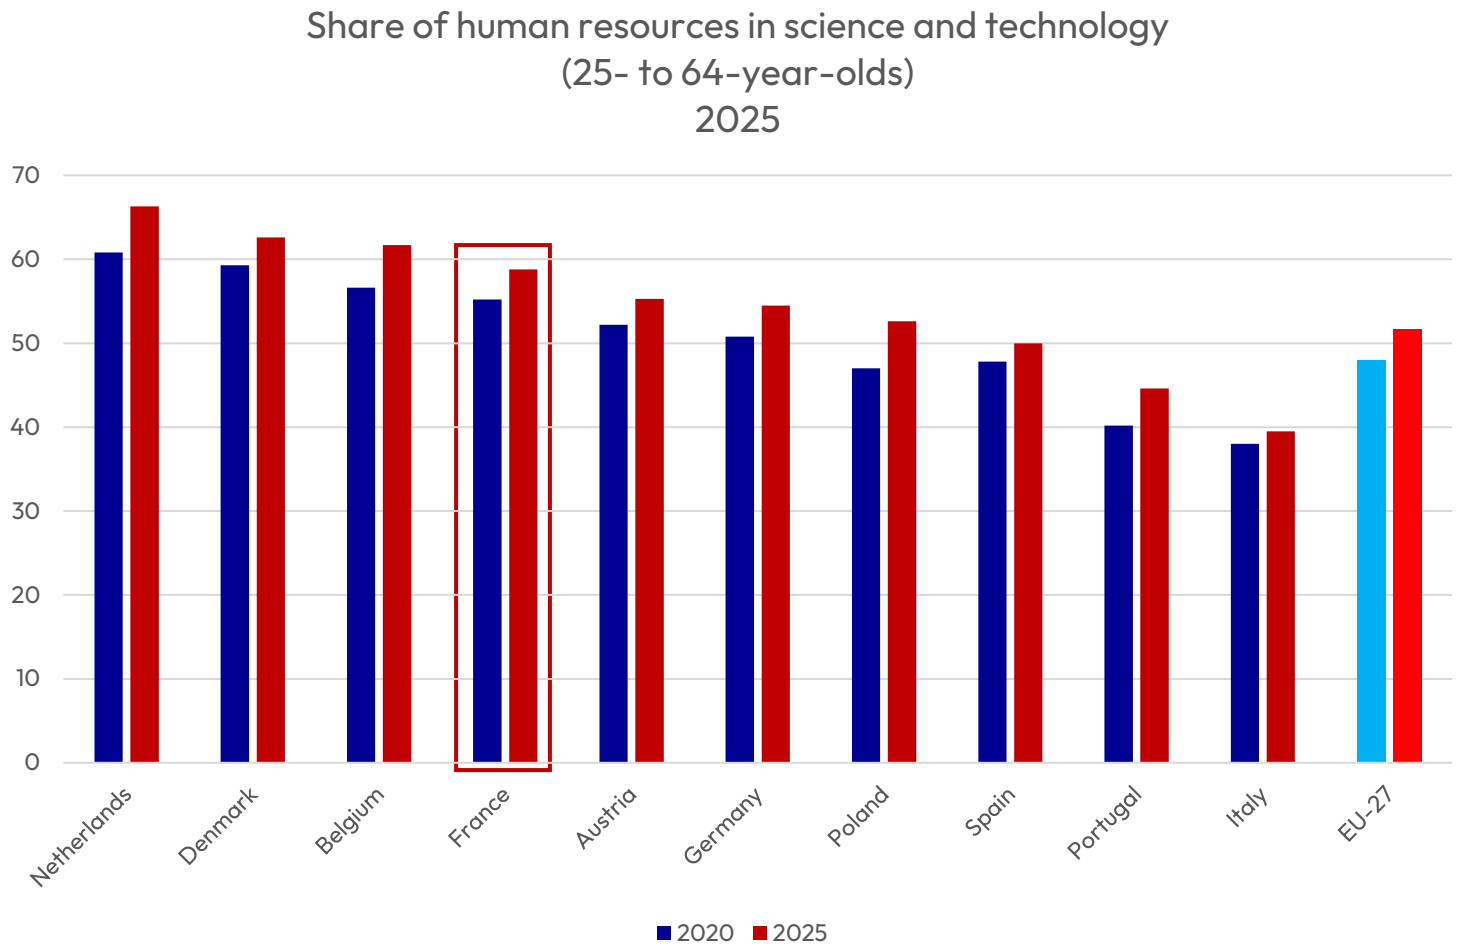

#7

Country for the number of researchers in 2021

(Campus France, 2025)

France has a well qualified workforce…

59%

The share of the active population with a higher education degree or employed in a scientific or technological position.

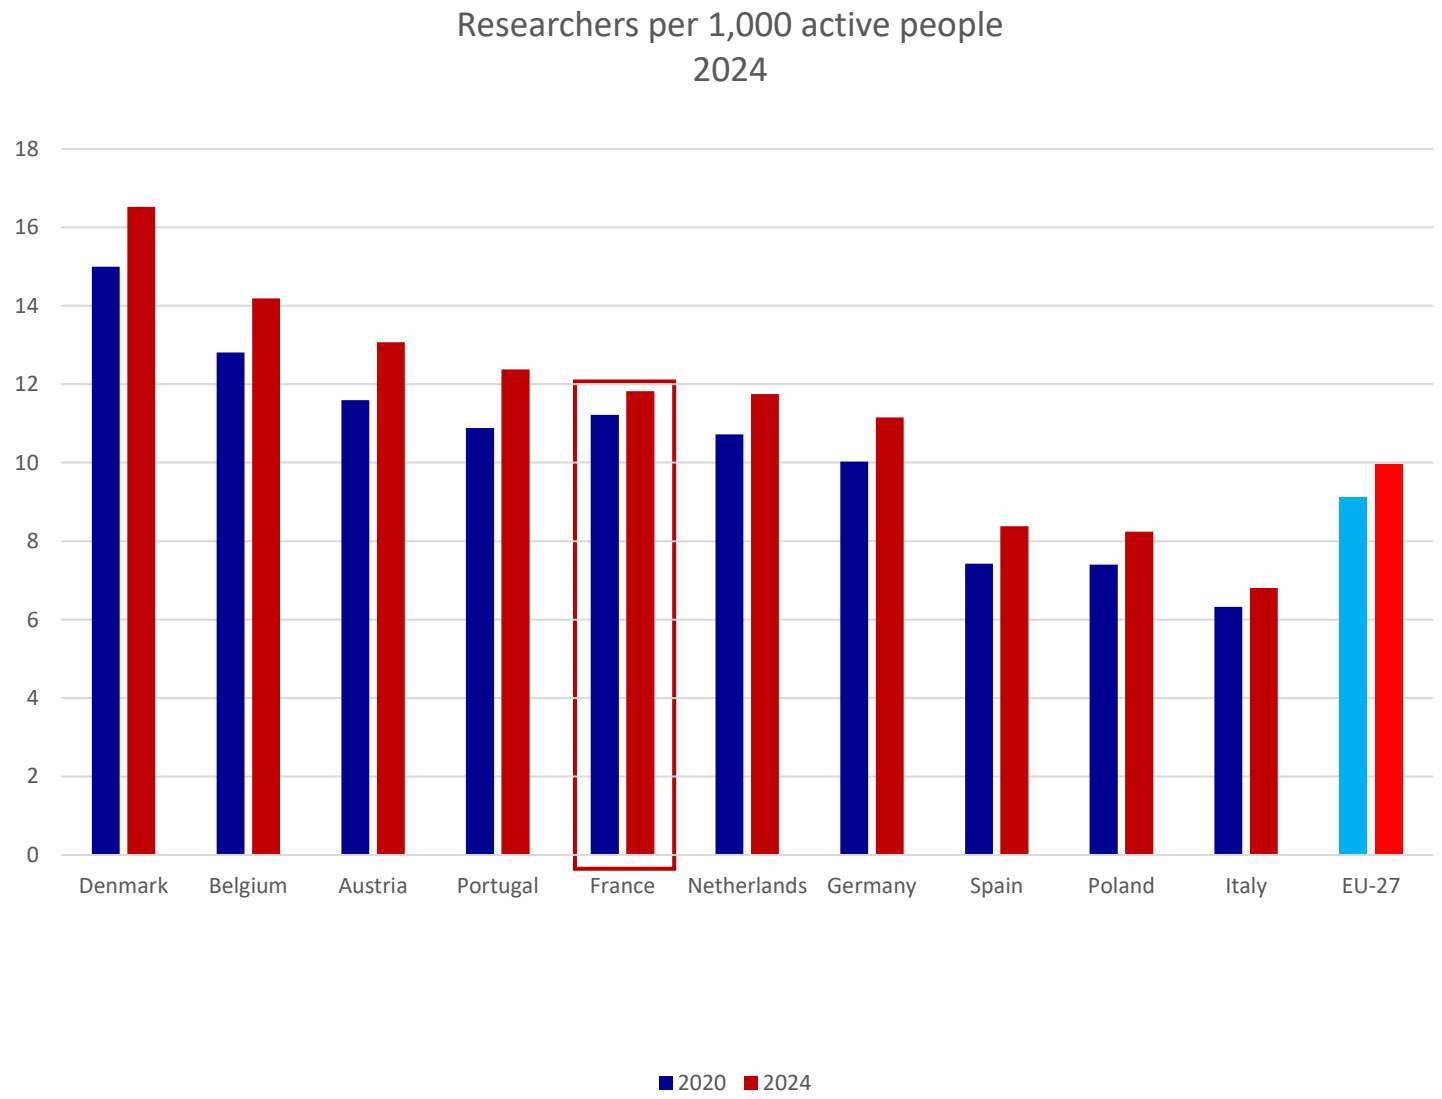

+3.6 percentage points

The increase in the share of human resources in science and technology (HRST) in France, in percentage points, between 2020 and 2025 (+3.7% points in the European Union).

Key: **Human resources in science and technology** (HRST) are one of the main drivers of knowledge-based economies. In addition to higher education graduates, they include people employed in a scientific or technological position for which a high level of qualification is required.

Source: Eurostat, 2026

… and a high number of researchers

11.8 researchers

Per 1,000 active people in France (2024).

#7

Country in the world with the most researchers: 333,800 in 2021.

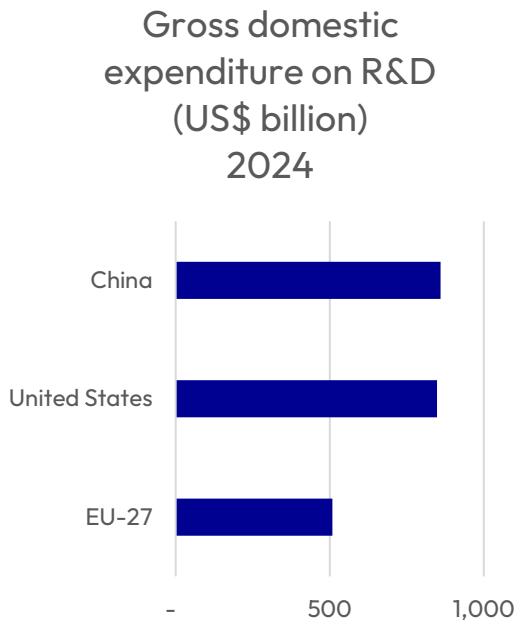

-27%

Decrease in the average cost of a researcher for a business thanks to the research tax credit.

Source: OECD, 2026; Campus France, 2025

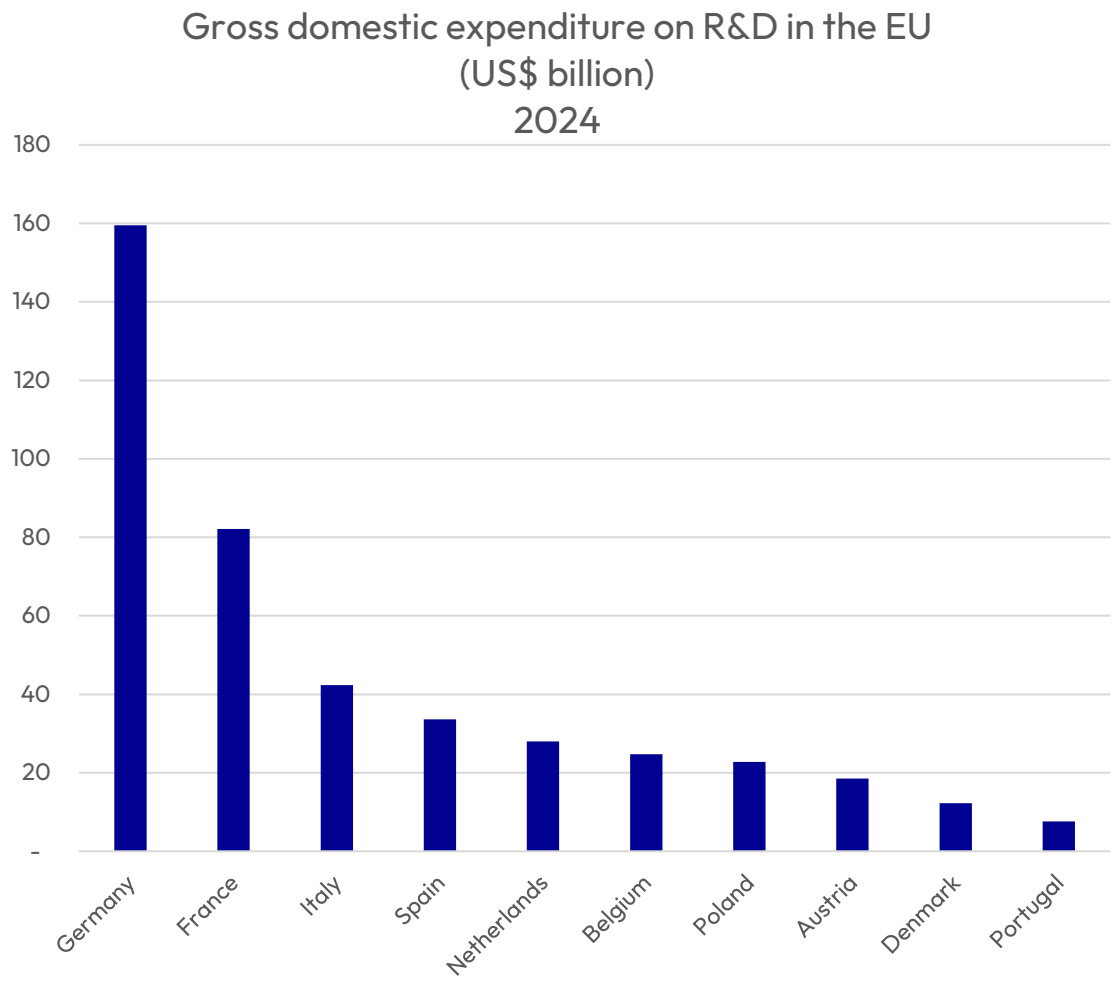

France is the #3 country in Europe for R&D spending

Available at: Welcome.BusinessFrance

US$508 billion

of domestic R&D expenditure in the EU in 2024

* 2023

US$82 billion

The amount of gross domestic expenditure on R&D in France in 2024.

2.2%

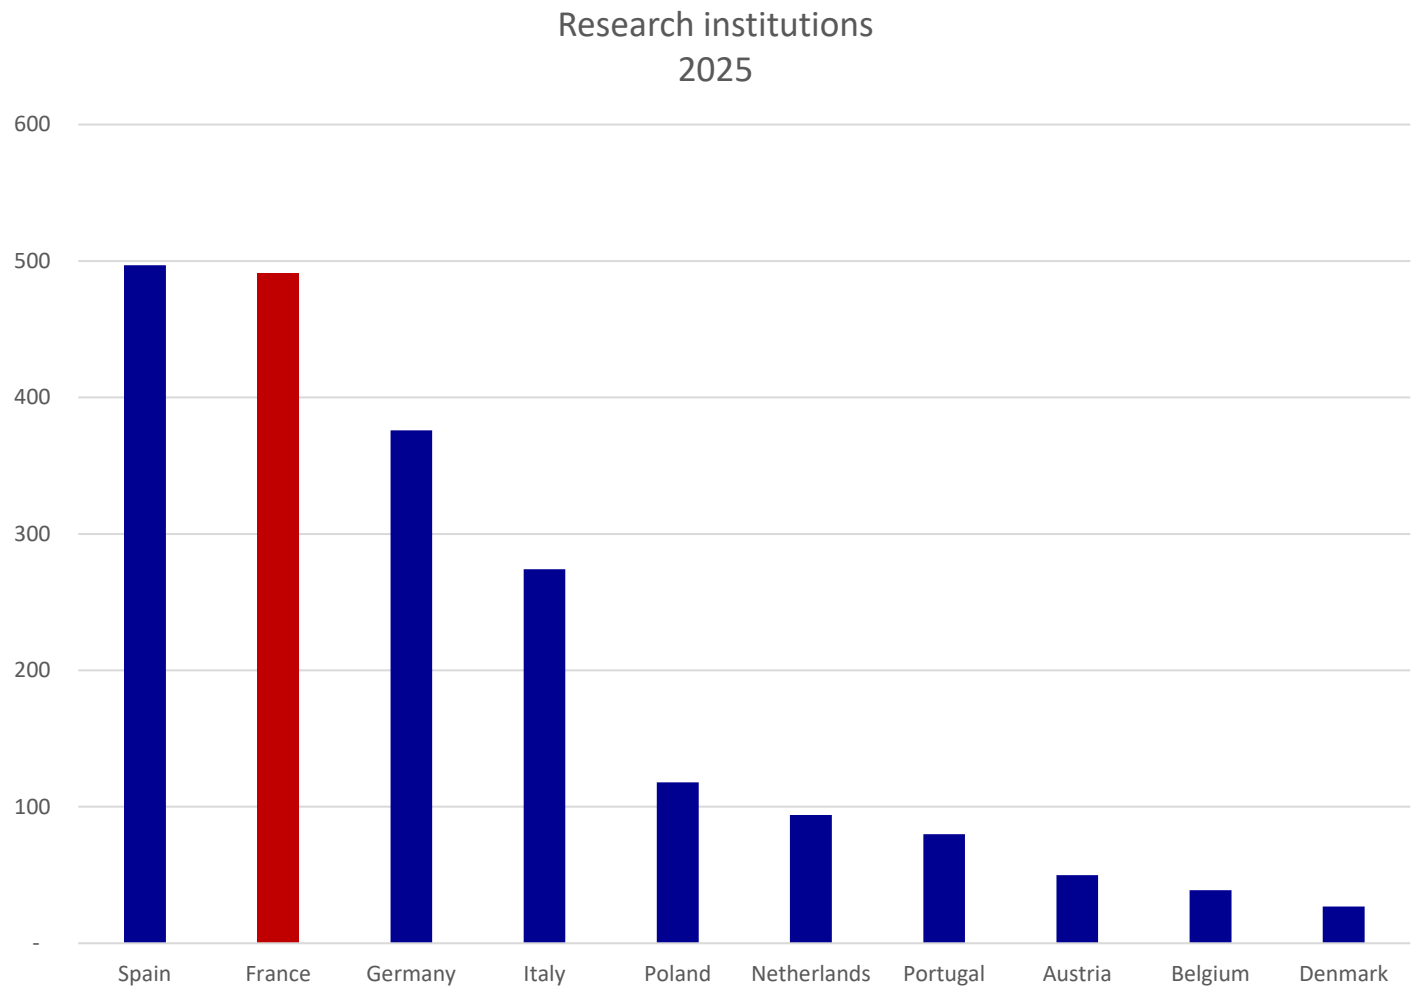

GDP spent on R&D activities in 2024, higher than the EU average (2.1%).

3%

GDP to be spent on R&D activities by 2030, according to the Research Programming Act.

Source: OECD, 2026; MESR

France boasts numerous leading research institutions

491

Research institutions in France, home to the world's fourth highest number.

#3

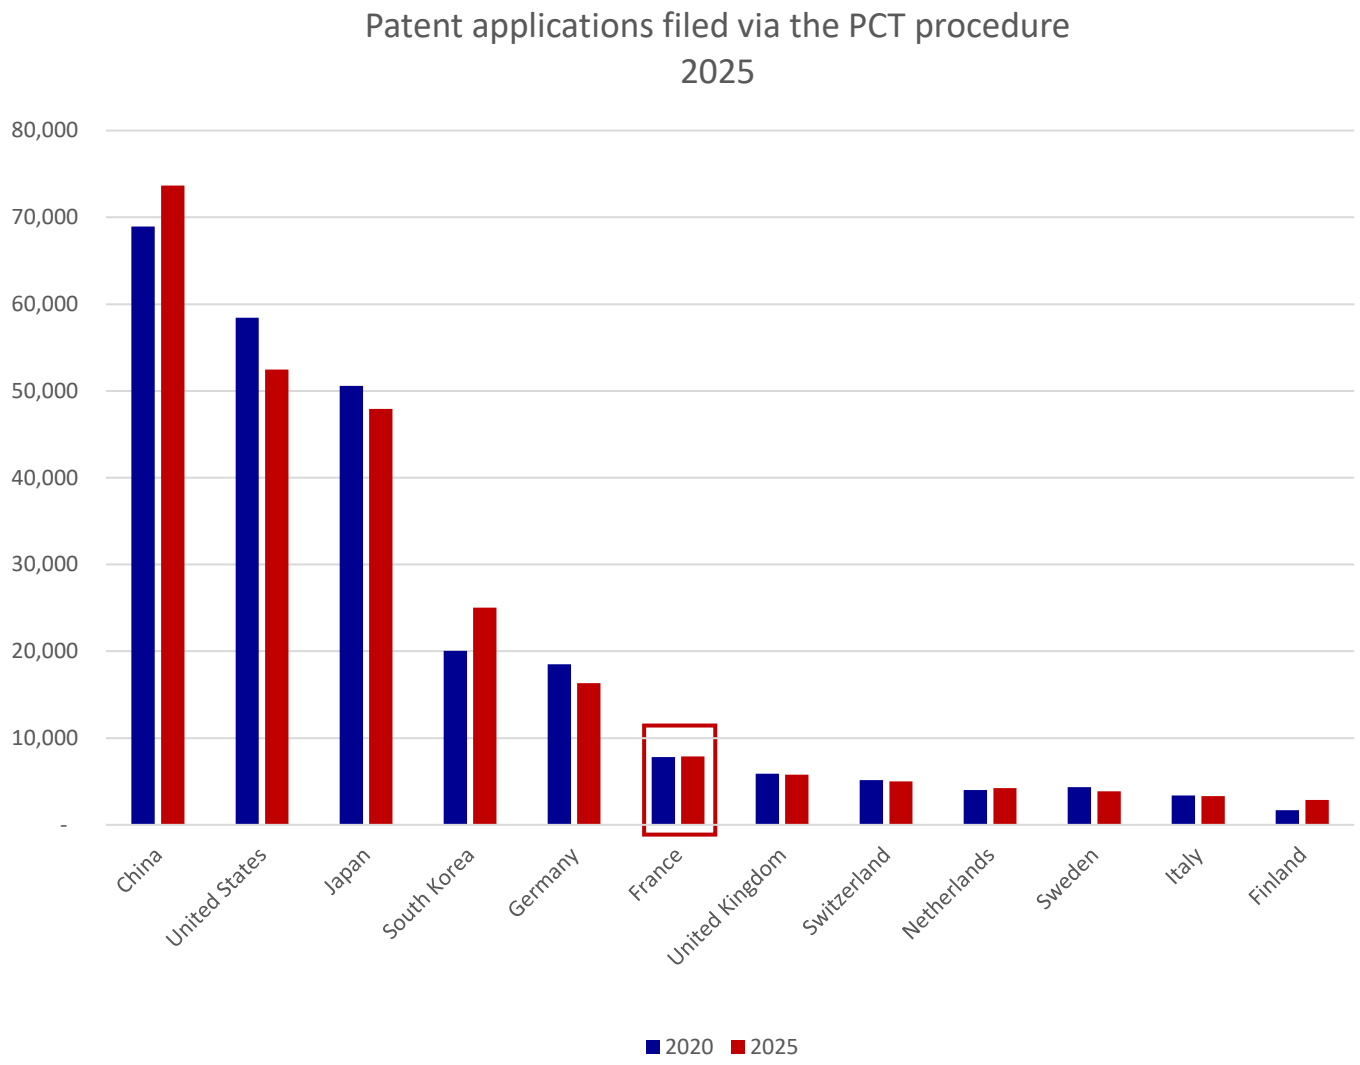

Global ranking (and #1 in Europe) for the research institution the CNRS, after two Chinese institutions.

Key: The **SCImago Institutions Rankings** is a tool for evaluating research and higher education institutions, based on a combination of bibliometric, innovation and societal impact indicators.

Source: SCImago, 2026

Dynamic research on a global scale

Available at:
Welcome.BusinessFrance

#6

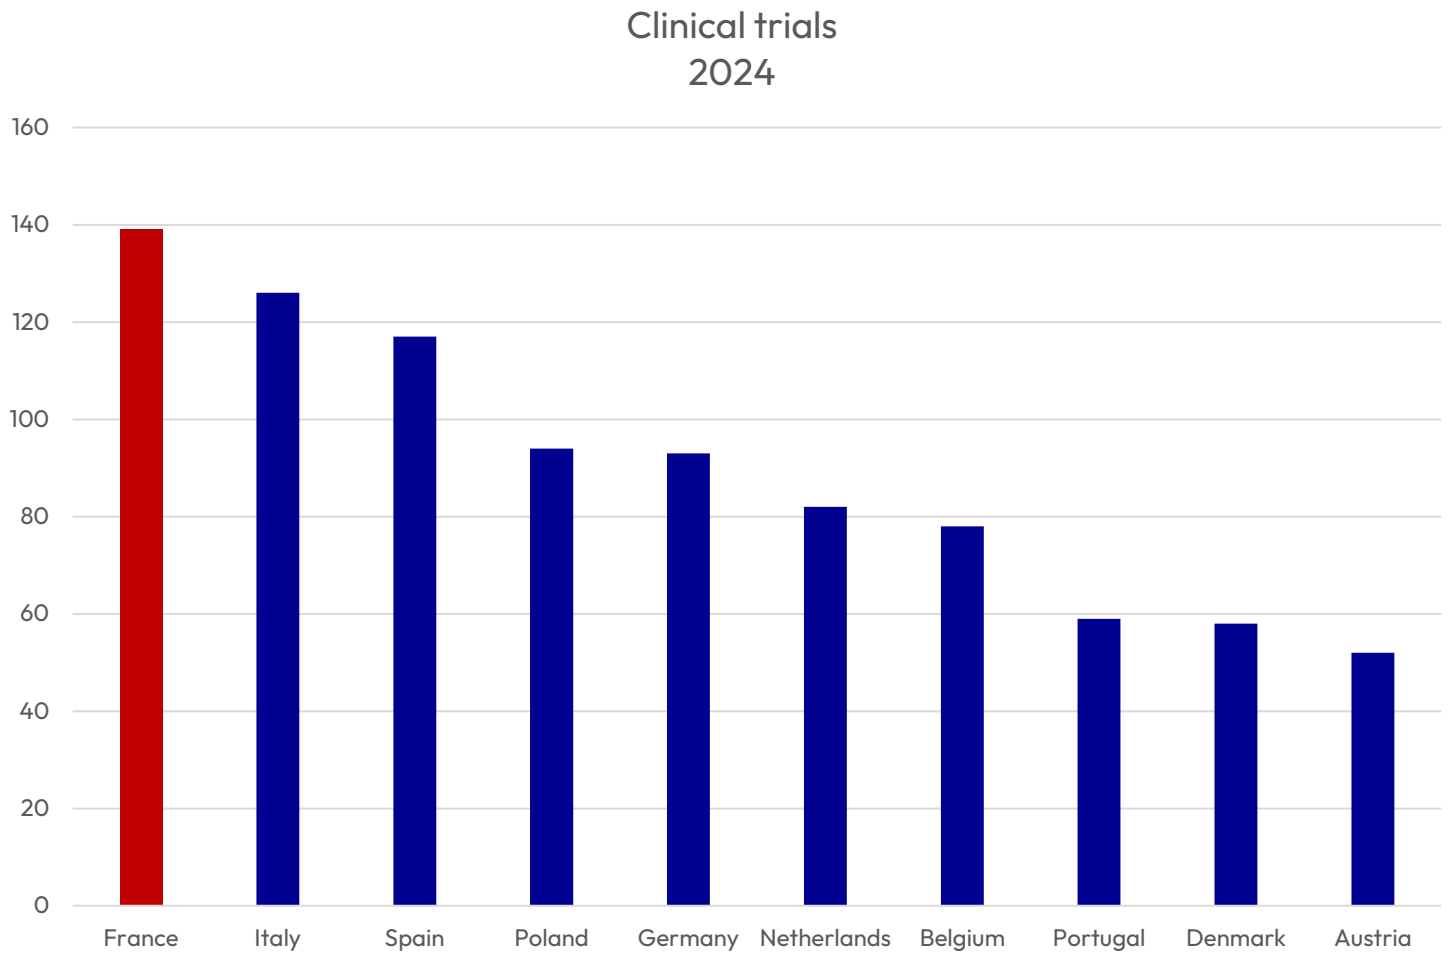

Country for patent applications filed via the PCT procedure in 2025 (7,875 applications).

#2

European country after Germany.

Source: WIPO, 2026

France, a global leader in the medical field

#1

EU country in terms of the number of clinical trials in 2024, with 139 trials.

€7.5 billion

From the “France 2030” plan dedicated to healthcare, including €1 billion for strengthening biomedical research.

Key: A clinical trial is a scientific study conducted on human volunteers to evaluate the efficacy, tolerance and safety of a treatment, drug, medical device, or therapeutic strategy. It follows a rigorous protocol and is often carried out in several phases before possible marketing authorization.

Source: EU Clinical Trials Register, 2026

A country focused on research and the future

€54 billion

Investment in disruptive technologies via the “France 2030” plan.

#1

Country for hosting startups, according to the ESNA 2025 report.

#1

EU country in terms of financial support for R&D projects, according to the European Innovation Scoreboard 2026.

€5.7 billion

R&D expenditure dedicated to the environment.

€1.7 billion

R&D expenditure on Artificial Intelligence.

04

Education and human capital

FRANCE HAS AN EXCELLENT EDUCATION SYSTEM

5.3%

Proportion of France's GDP that is invested in education in 2023

(Eurostat, 2026)

56%

Proportion of 25- to 34-year-olds that had a tertiary education qualification in 2025

(Eurostat, 2026)

12%

Tertiary education graduates that work in engineering

(UNESCO, 2026)

#1

EU country, alongside Germany, in the Shanghai Rankings, with four universities in the top 100

#3

EU country in terms of the number of doctoral level students

(Eurostat, 2026)

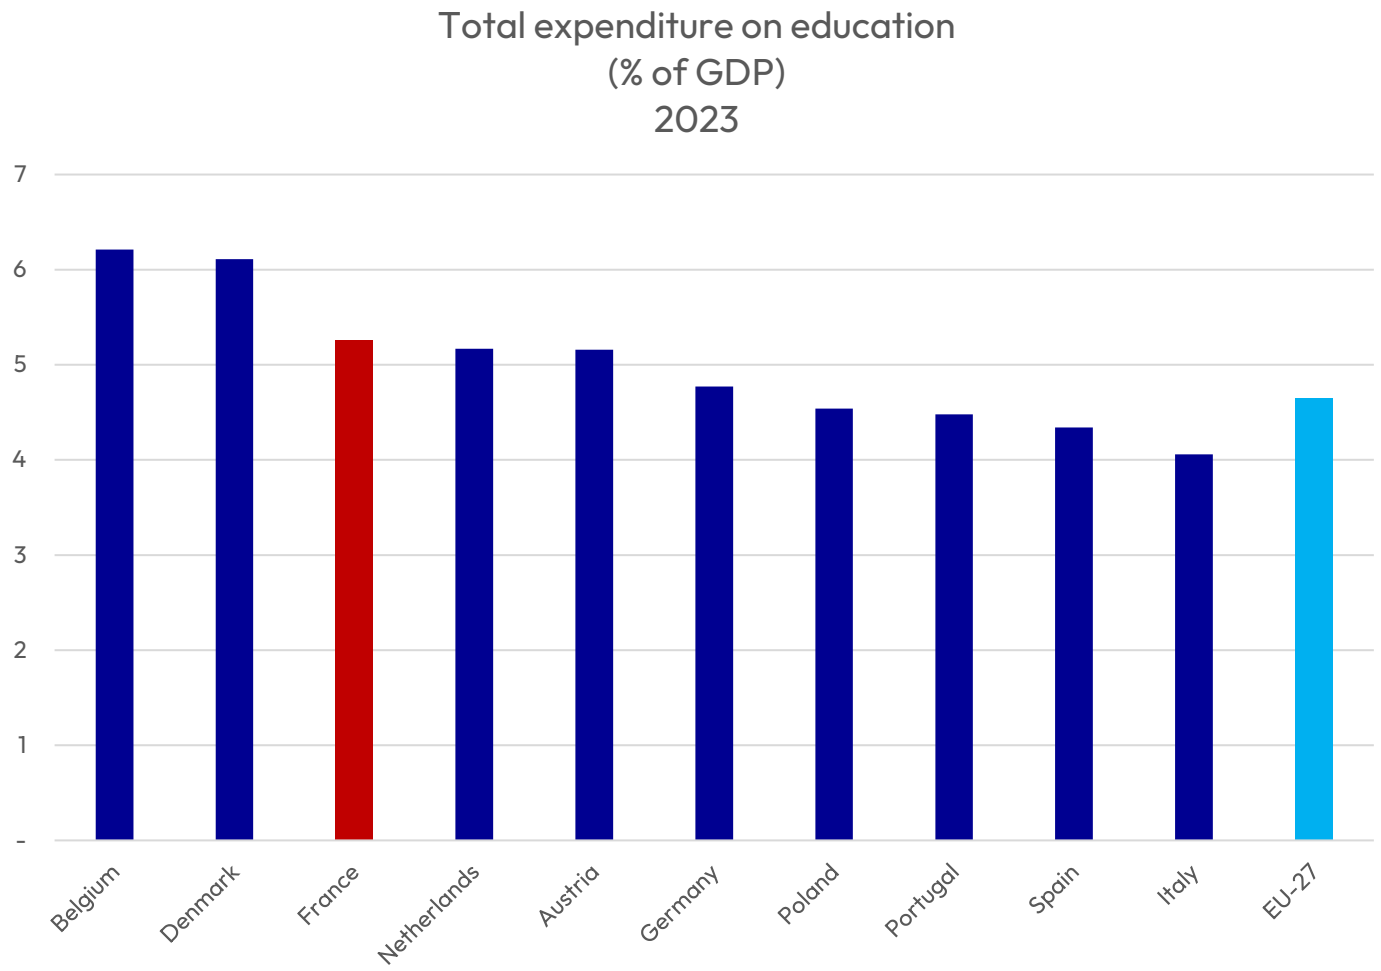

80%

Proportion of foreign graduates in France that choose to pursue their career in France

(Campus France, 2024)

France invests in its education system

5.26%

GDP that was invested in education in 2023.

€149 billion

The amount spent on education in 2023, making France the second leading country in Europe.

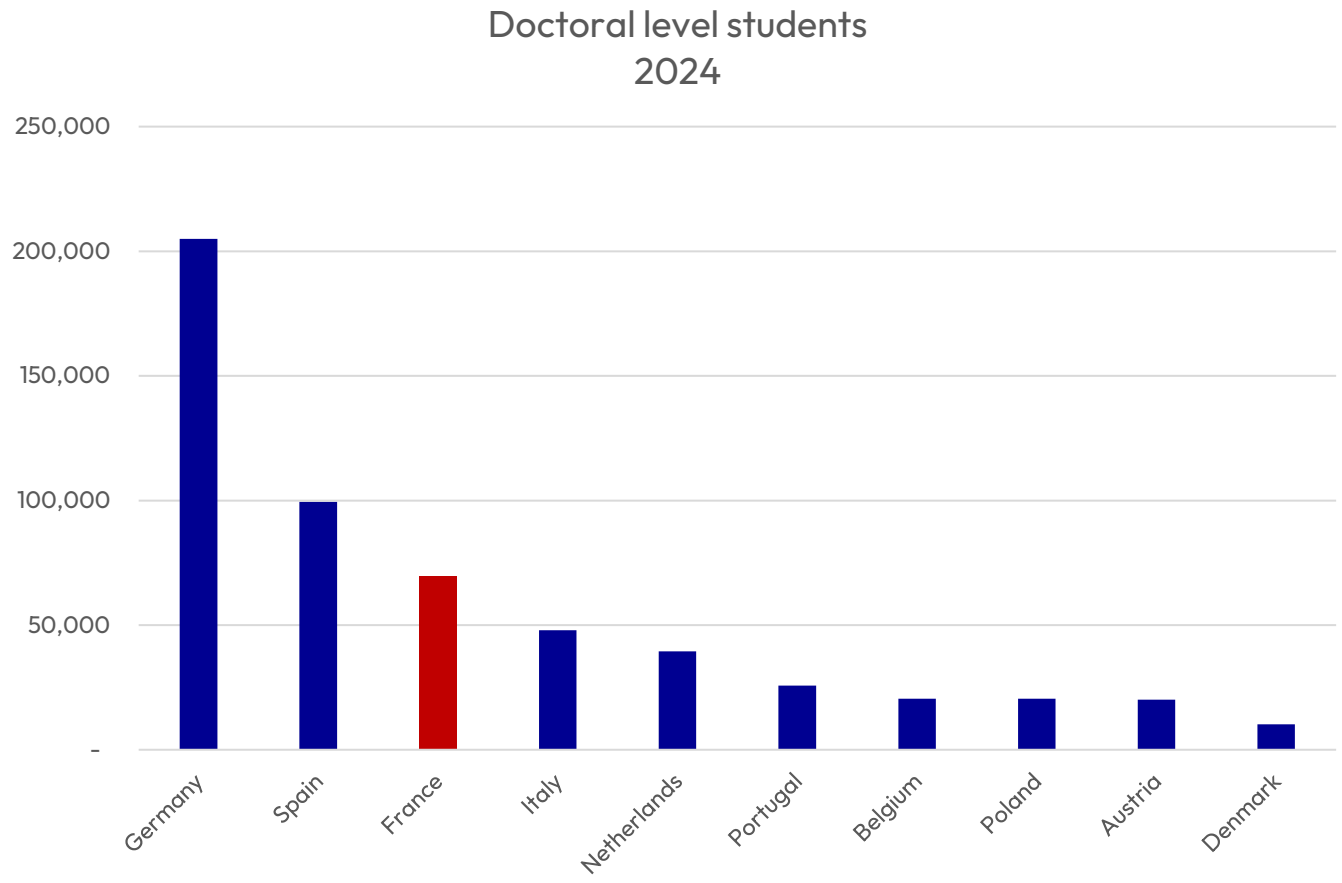

€13,060

Average cost per student in tertiary education.

* 2022

Source: Eurostat, 2026; Ministry for Higher Education and Research (MESR), 2026

Human capital that continues to grow

#3

EU country for the number of doctoral level students, with 69,639 registered in 2024.

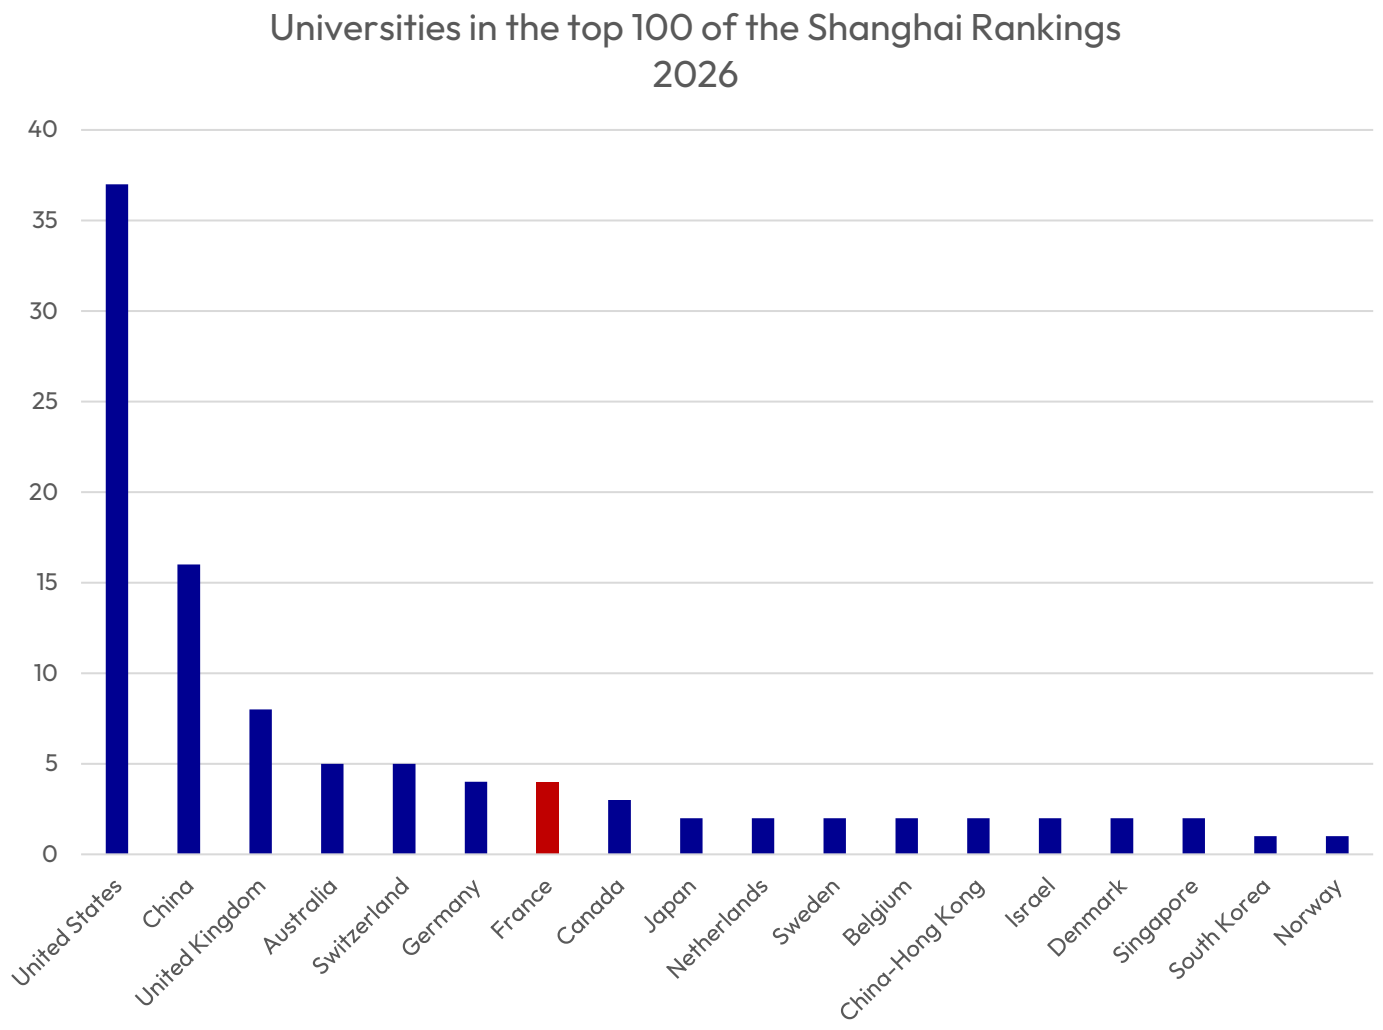

2,150 CIFRE PhDs

The government's target for the number of CIFRE PhDs per year from 2027.

Key: **The "Industrial Agreements for Training through Research"** (CIFRE) scheme subsidizes any business operating under French law that hires a doctoral level graduate to place them at the heart of a research partnership with a public laboratory.

Source: Eurostat, 2026

French universities recognized for their high-quality education

4

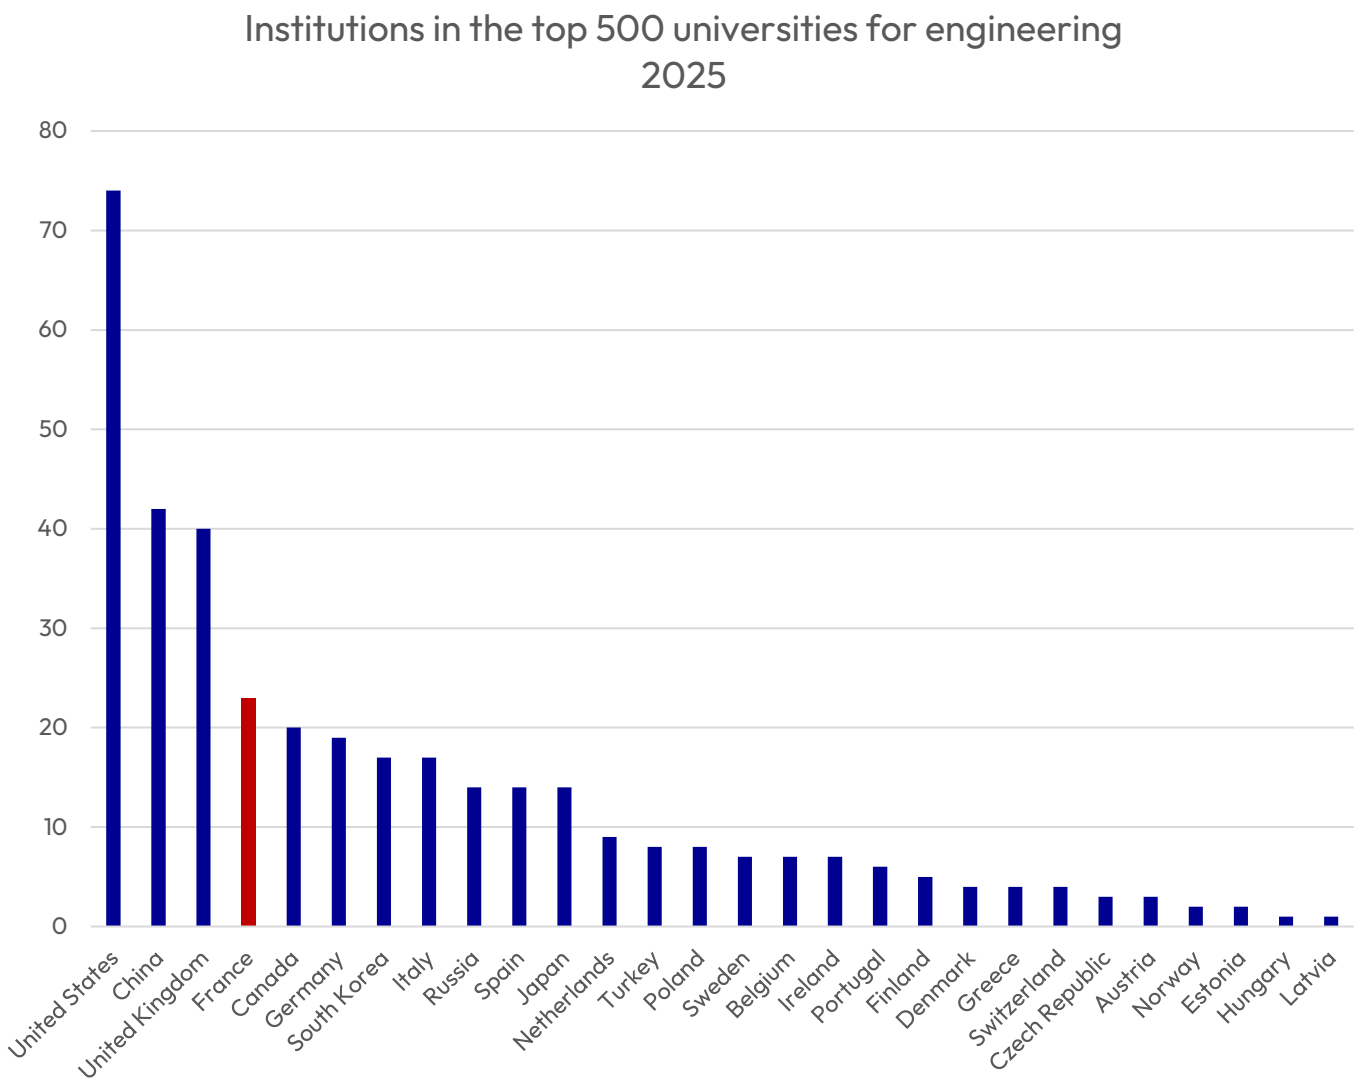

French universities in the top 100 of the 2026 Shanghai Rankings; France is the joint leading EU country, tied with Germany.

#1

Paris-Saclay University's position in Europe, and 13th in the world.

Source: Shanghai Rankings, 2026

French universities also enjoy high-quality engineering courses

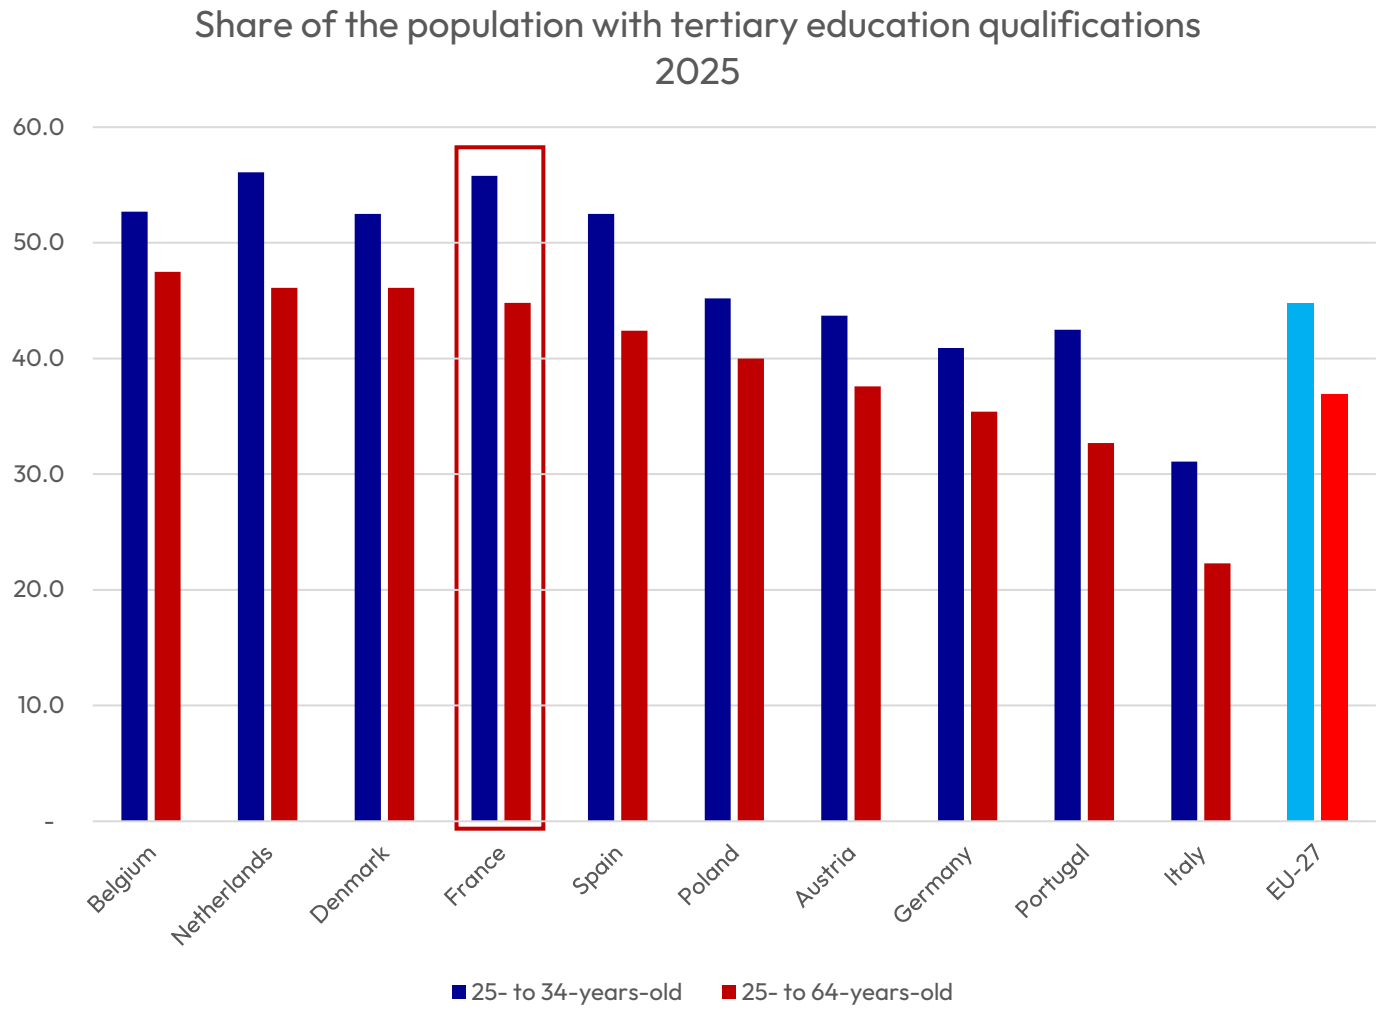

23

French institutions in the top 500 universities for engineering in the QS 2026 rankings, with the country number one in the European Union.

Source: QS, 2026

A well-trained workforce, particularly among young people

Available at:
Welcome.BusinessFrance

56%

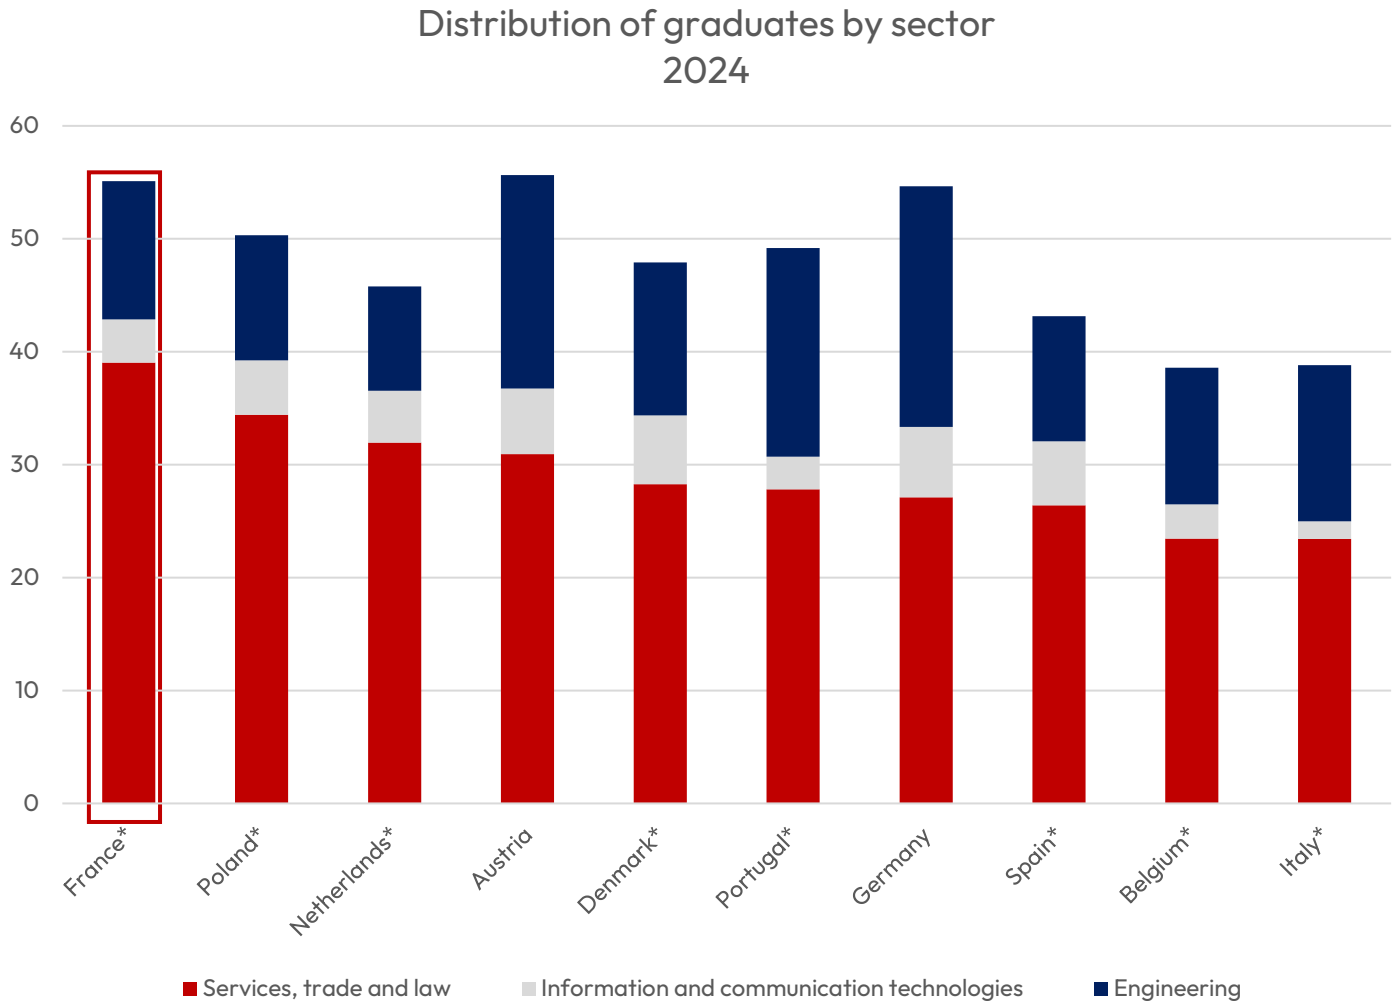

Proportion of 25- to 34-year-olds (45% of 25- to 64-year-olds) with tertiary education qualifications in France in 2025.

35%

Proportion of 15- to 24-year-olds that are in employment, in line with the European average.

Source: Eurostat, 2026; OECD, 2026

Graduates present in all business sectors

39%

Proportion of tertiary education graduates that work in the service, business and law sectors.

4%

Proportion of tertiary education graduates that work in the information and communications technologies sector.

12%

Proportion of tertiary education graduates that work in the engineering sector.

* 2022 ** 2021

New areas of teaching

€2.5 billion

The “France 2030” plan will focus on adapting training to the skills requirements of new sectors and professions of the future.

€211 million

Invested in the field of digital sovereignty, particularly in artificial intelligence through the “Skills and Professions of the Future” call for expressions of interest.

222,300

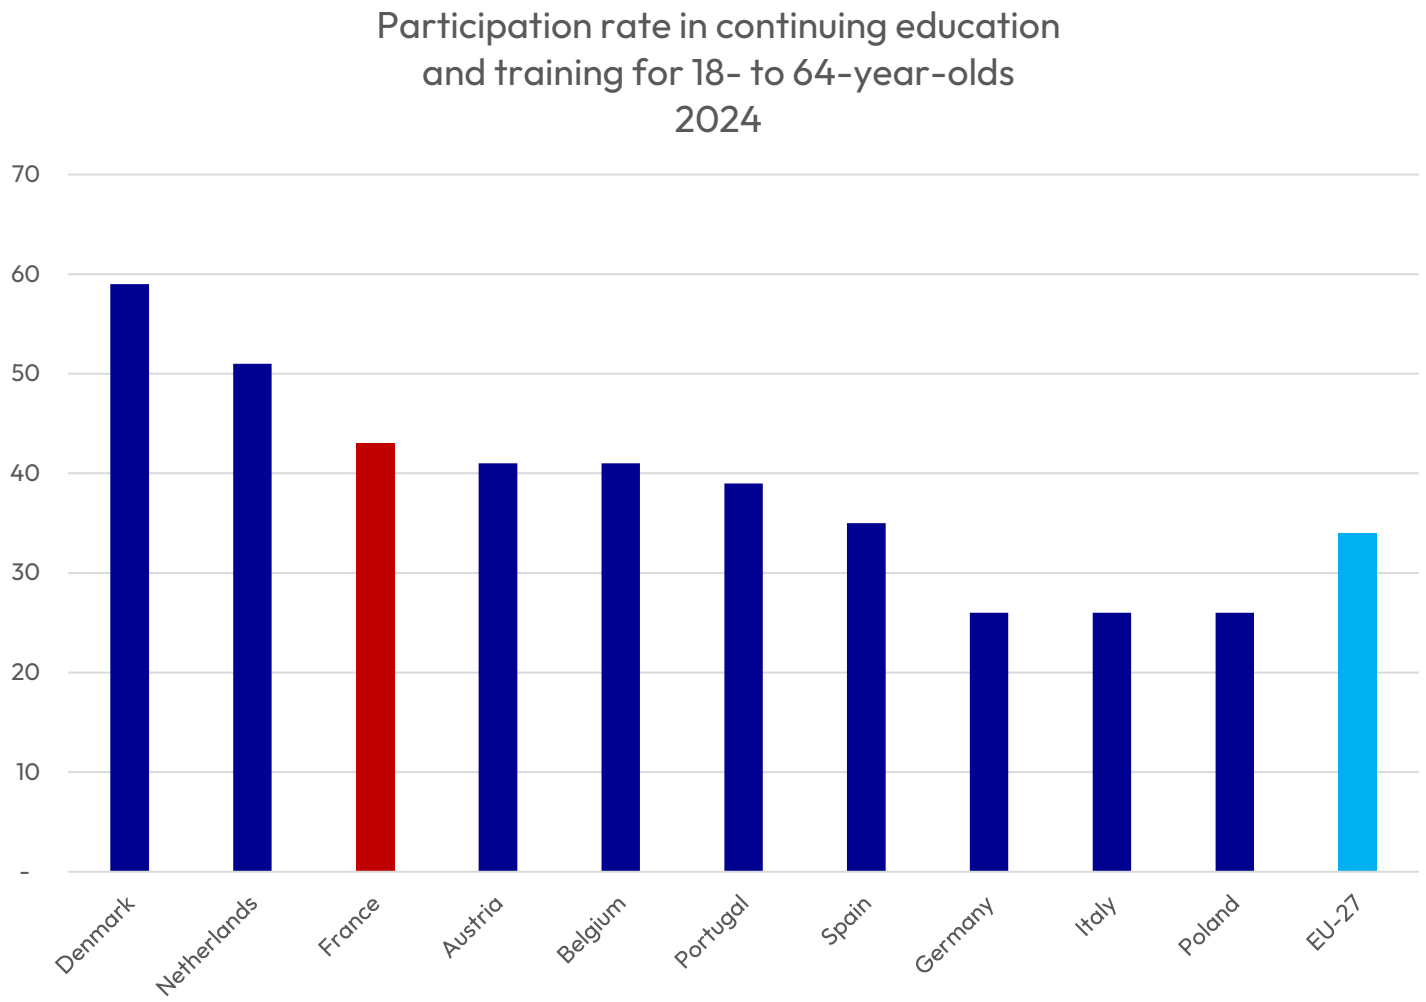

People trained for the professions of the future in 2025.

182

Projects already supported by the “Skills and Professions of the Future” call for expressions of interest.

Source: SGPI, 2026; MT, 2026

Human capital that continues to grow

43%

Proportion of 18- to 64-year-olds that were in further education in France in 2024.

€29.5 billion

Amount invested in 2024 for continuing professional development and apprenticeships, representing 15% of expenditure linked to employment policies.

+54%

In apprenticeship contracts between 2020 and 2025, with more than one million apprentices in 2025.

Key: **Continuing professional development** refers to training provided to professionals who have already completed their initial training.

Source: Eurostat, 2026; Dares, 2026

05

Infrastructure

FRANCE HAS EXCELLENT INFRASTRUCTURE

#2

Airport in the European Union for passengers: Paris-CDG

(Eurostat, 2026)

1,766

Jobs created or maintained by 43 foreign investment projects in the telecommunications sector between 2020 and 2025

(Business France, 2026)

#1

European country for average internet speed and second in the world

(IMD, 2024)

#4

European country by volume of road freight transport

(Eurostat, 2026)

#2

European country by length of high-speed rail lines

(SNCF, 2026)

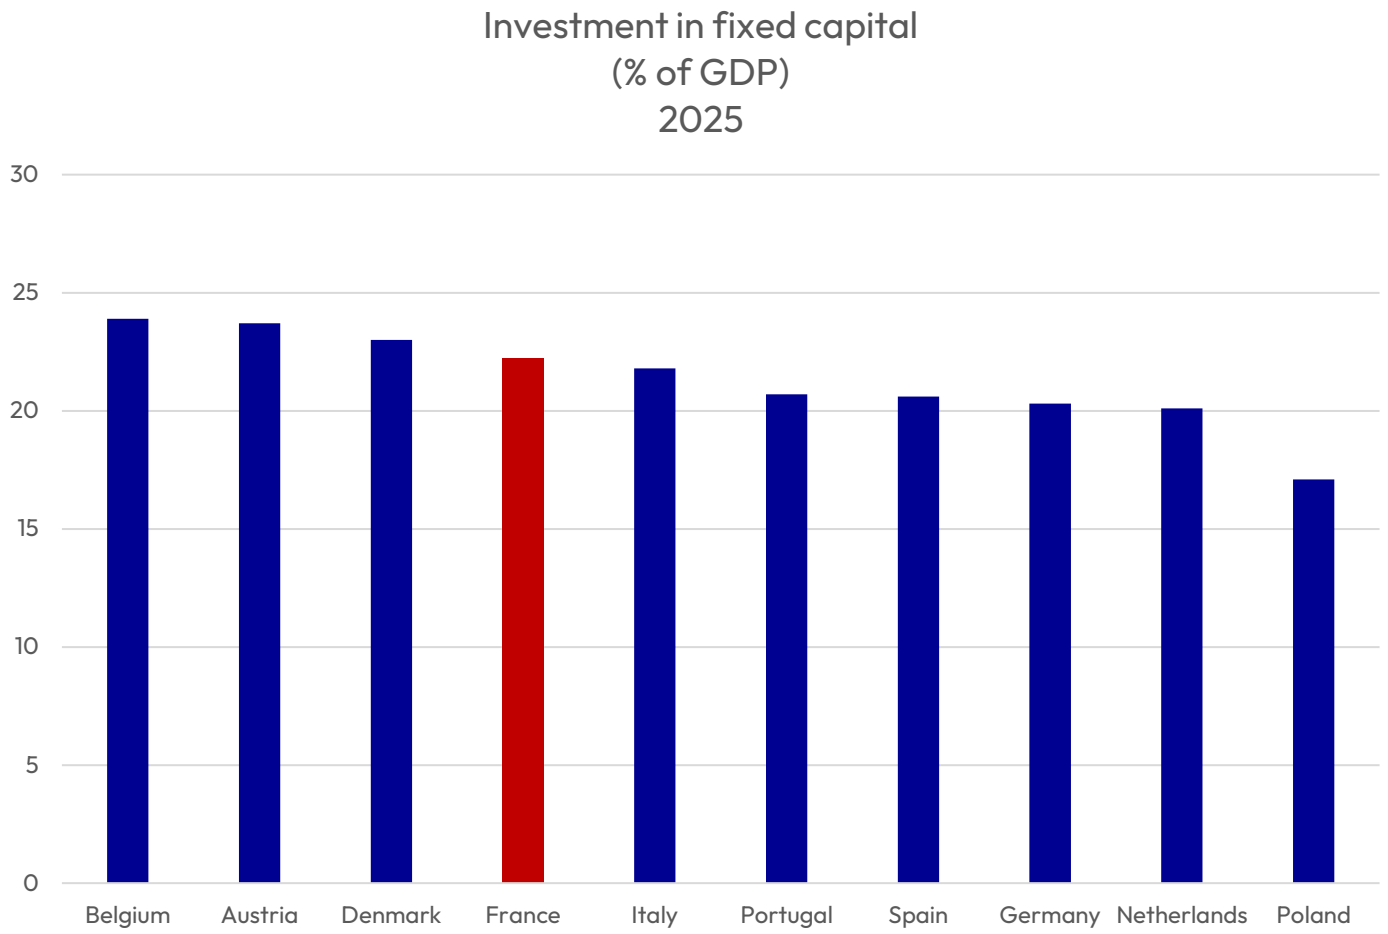

#6

European country by volume of river freight transport

(Eurostat, 2026)

Significant French capital investments

22%

Proportion of French GDP invested in fixed capital, such as machinery or infrastructure.

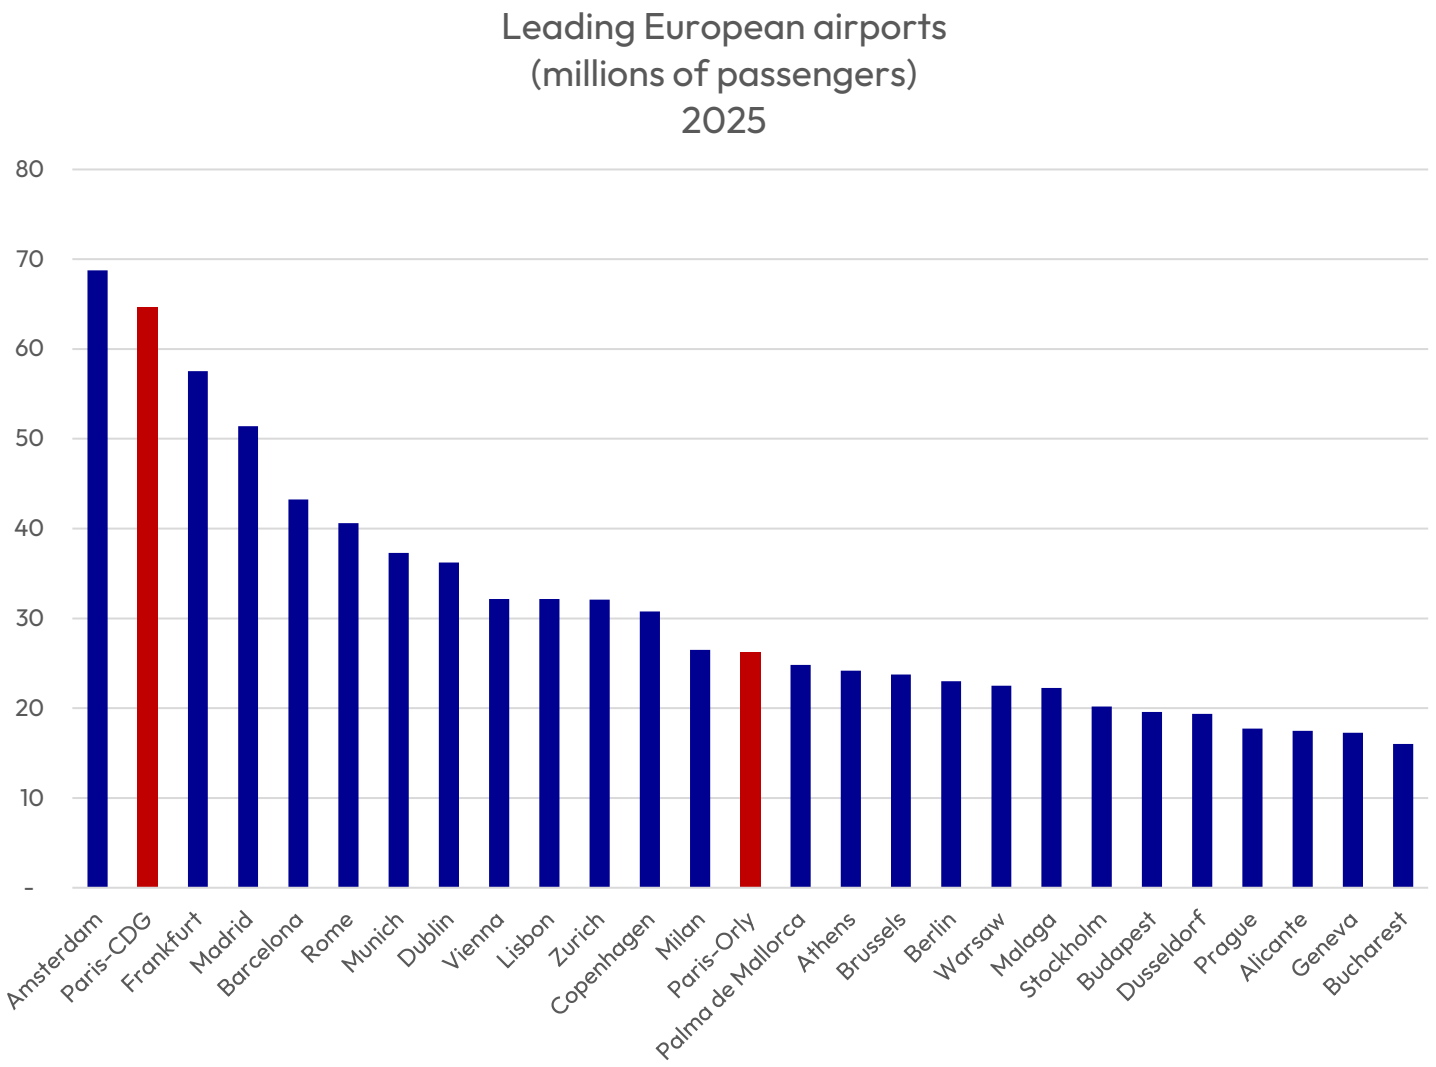

#2

European country for the gross amount of investment in fixed capital (€664 billion).

Key: **Gross fixed capital formation (GFCG)** measures the total investment made by economic agents in long-term production assets, such as infrastructure. A high GFCF is a favorable indicator for future growth.

Source: Eurostat, 2026

#1 airport hub in terms of passengers in the EU

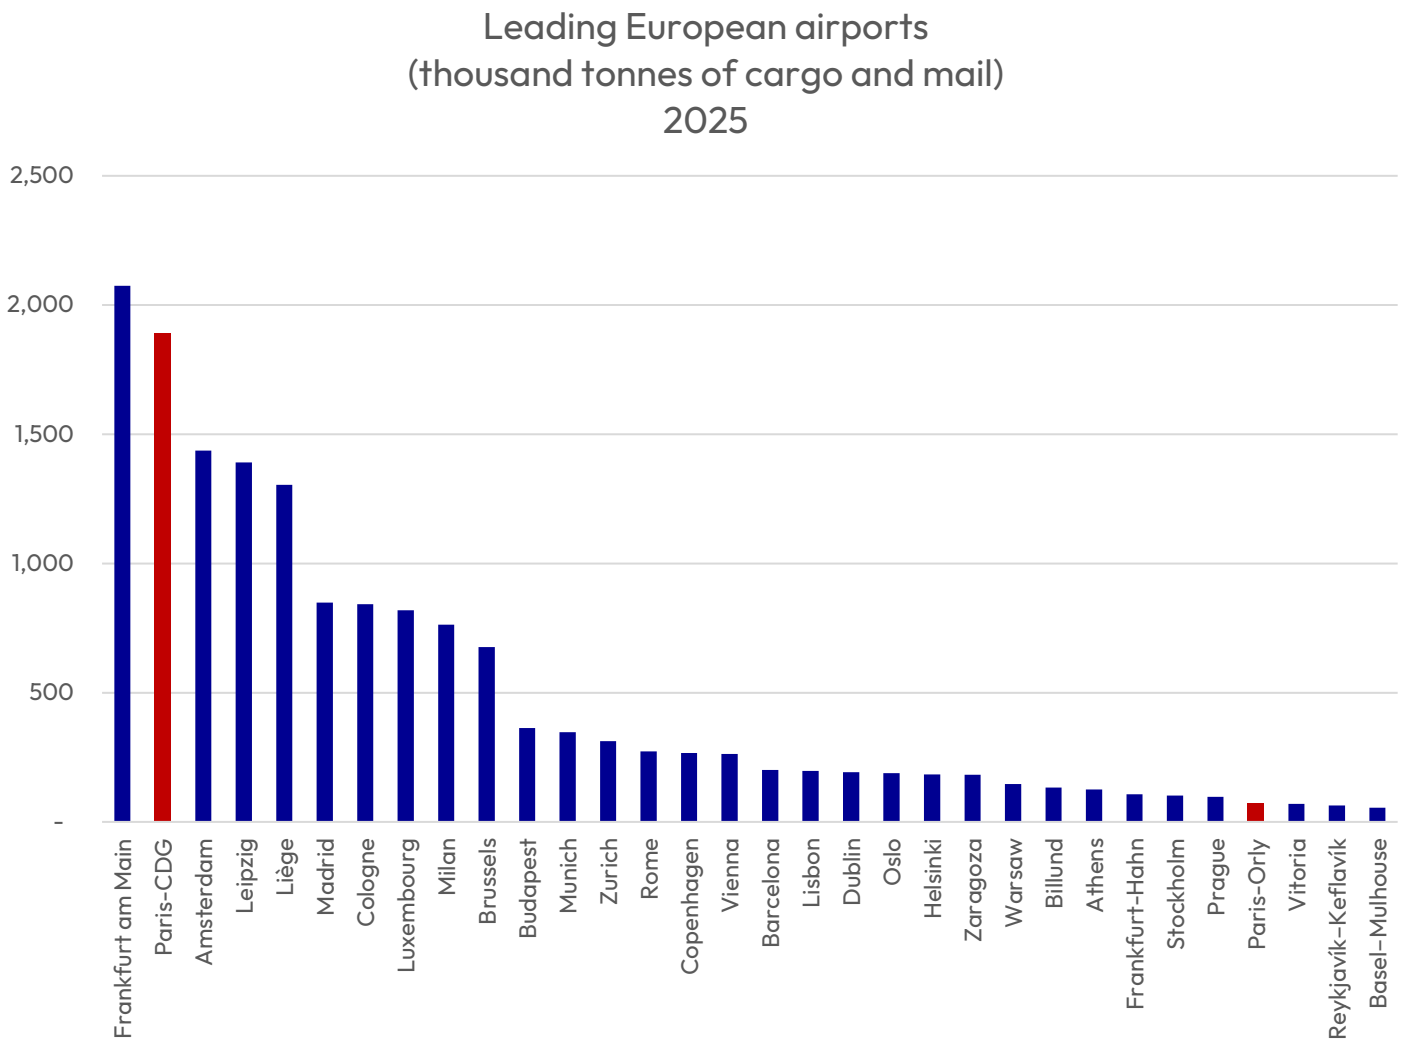

#2

Paris-Charles de Gaulle is the second-busiest airport for passenger transport in the European Union.

Source: Eurostat, 2026

An airport hub that is also commercial

1.9

Million tonnes of cargo and mail loaded at Paris Charles de Gaulle airport, the second largest airport in the EU in 2025.

€1.2 billion

Dedicated to investing in innovation for a low-carbon aircraft through the “France 2030” plan.

Source: Eurostat, 2026

Multimodal transport infrastructure throughout the country

#1

European country in terms of available river waterways.

#3

Largest European motorway network with 11,752 km (7,300 miles) of motorway and 8,576 km (5,330 miles) of national roads.

#2

European country for the length of high-speed railway lines, with 2,700 km (1,680 miles) for a total of 28,000 km (17,400 miles) of lines in France.

66 commercial ports

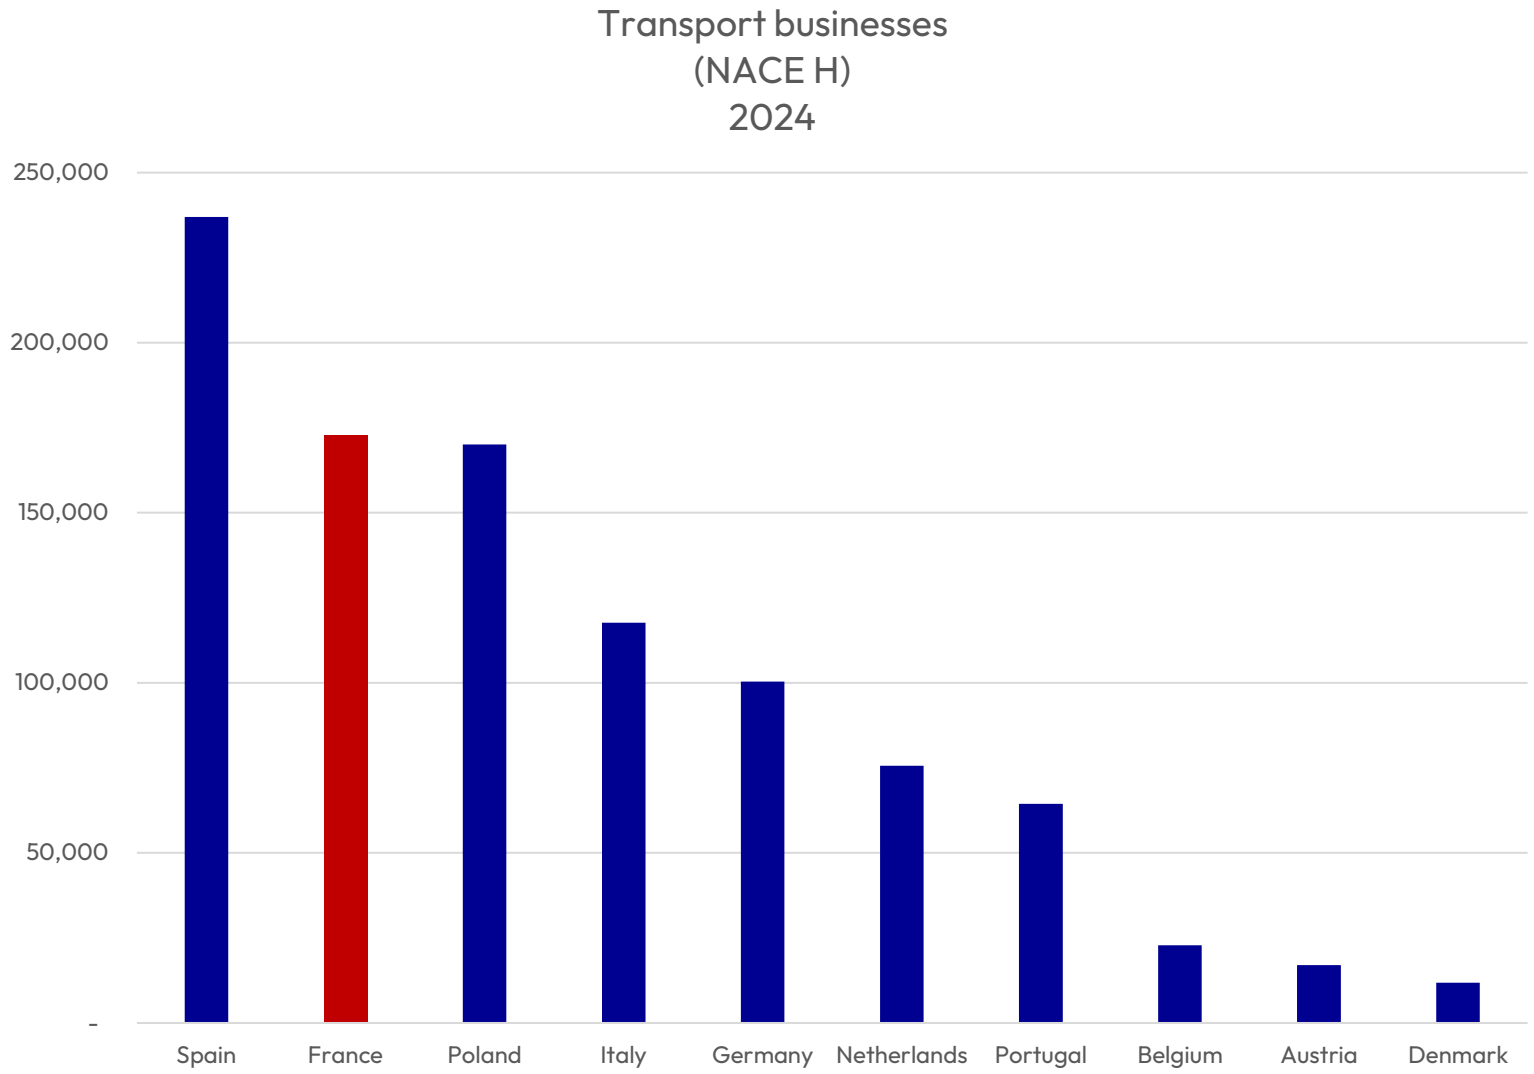

in France, including 11 major state-run seaports that handle 80% of maritime cargo traffic.

€100 billion

Investments to be made by 2040 to modernize and improve the French rail network through the “New Railway Deal” plan.

Source: EY, 2026; SNCF network, 2026; French Ministry for Transport, 2026

Strong presence of transport and logistics businesses

#2

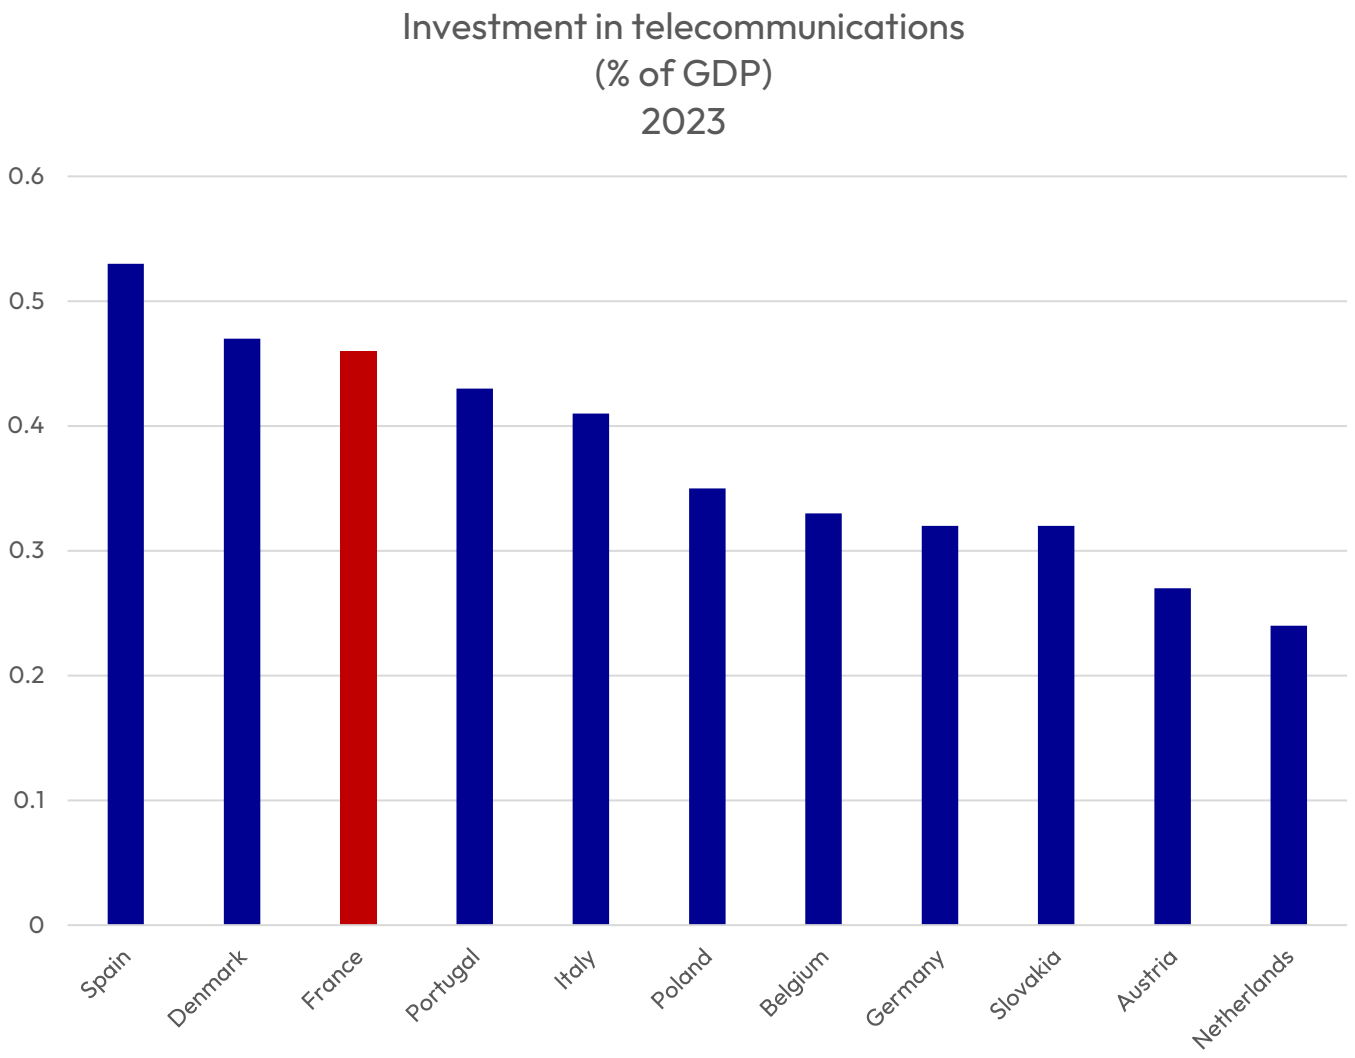

European country with the most transport and logistics businesses.

1.5 million

The number of people who work in the transport and storage sector in France.

Source: Eurostat, 2026

High level of investment in telecommunications

0.46%

Proportion of GDP that is invested in telecommunications infrastructure.

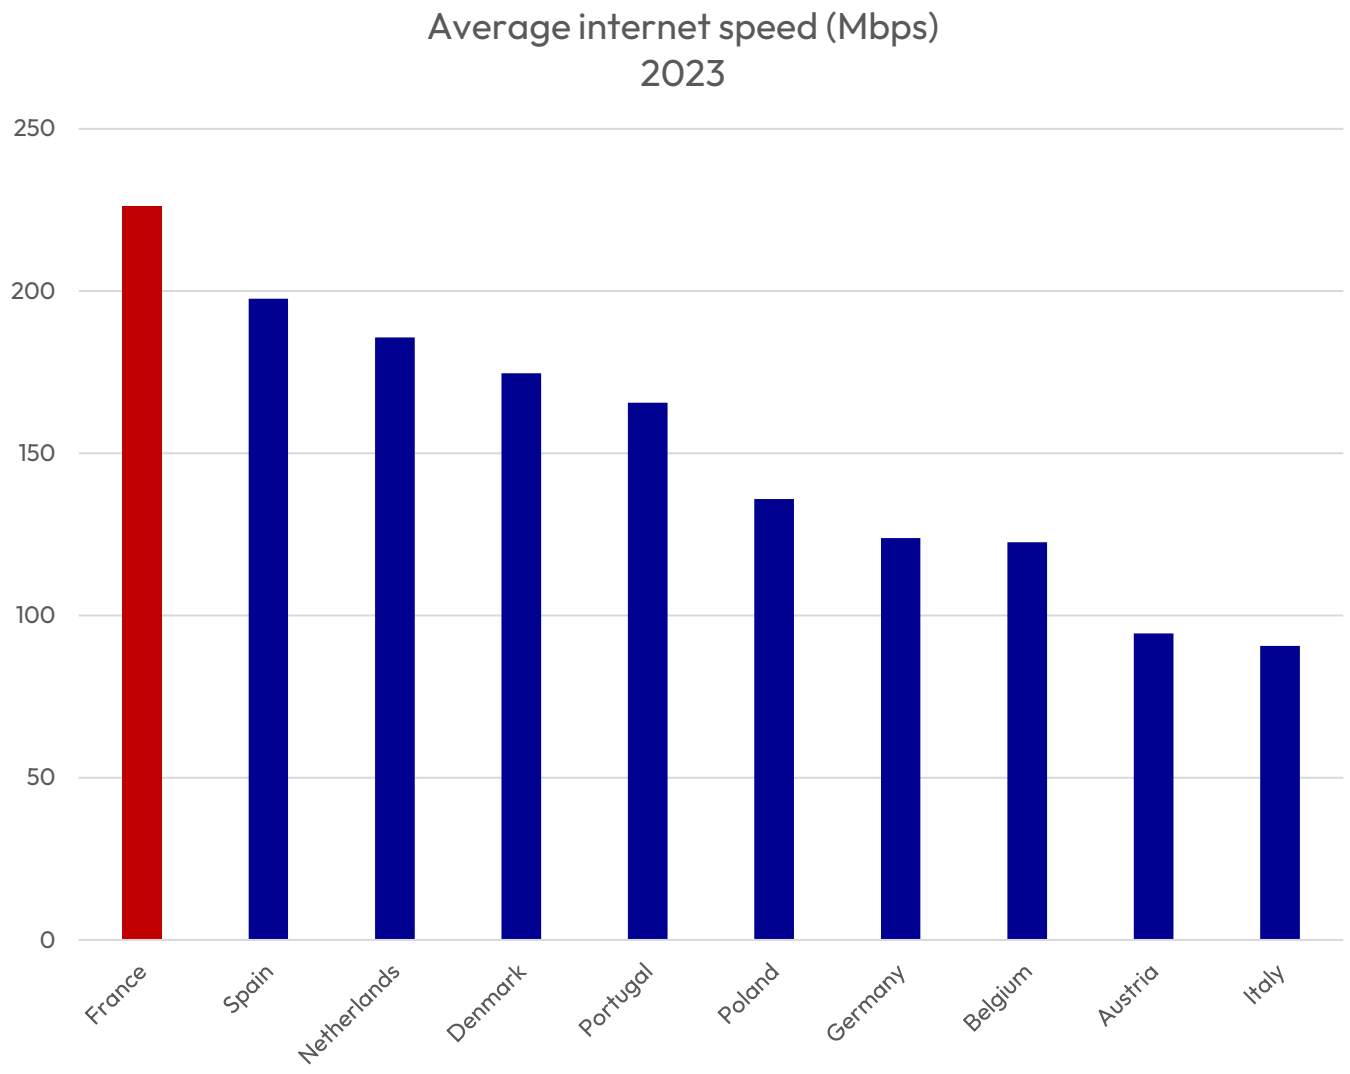

93,000 people

Work in telecommunications in France, the leading country in the EU.

Source: IMD, 2024 (M-labs / cable.co.uk, Ookla, Bandwidth Place); Eurostat, 2026

Cutting-edge network infrastructure

06

Ecological transition and green growth

FRANCE ON THE PATH TO ENERGY TRANSITION

65%

The share of nuclear energy in French electricity production in 2025

(IEA, 2026)

#1

Nuclear energy producer in Europe

(Connaissance des Énergies, 2024)

#1

European electricity exporter in 2025

(RTE, 2026)

94%

Electricity generated from decarbonized means of production in 2025

(IEA, 2026)

#2

Country in the EU for employment in the renewable energy sector in 2024

(IRENA, 2026)

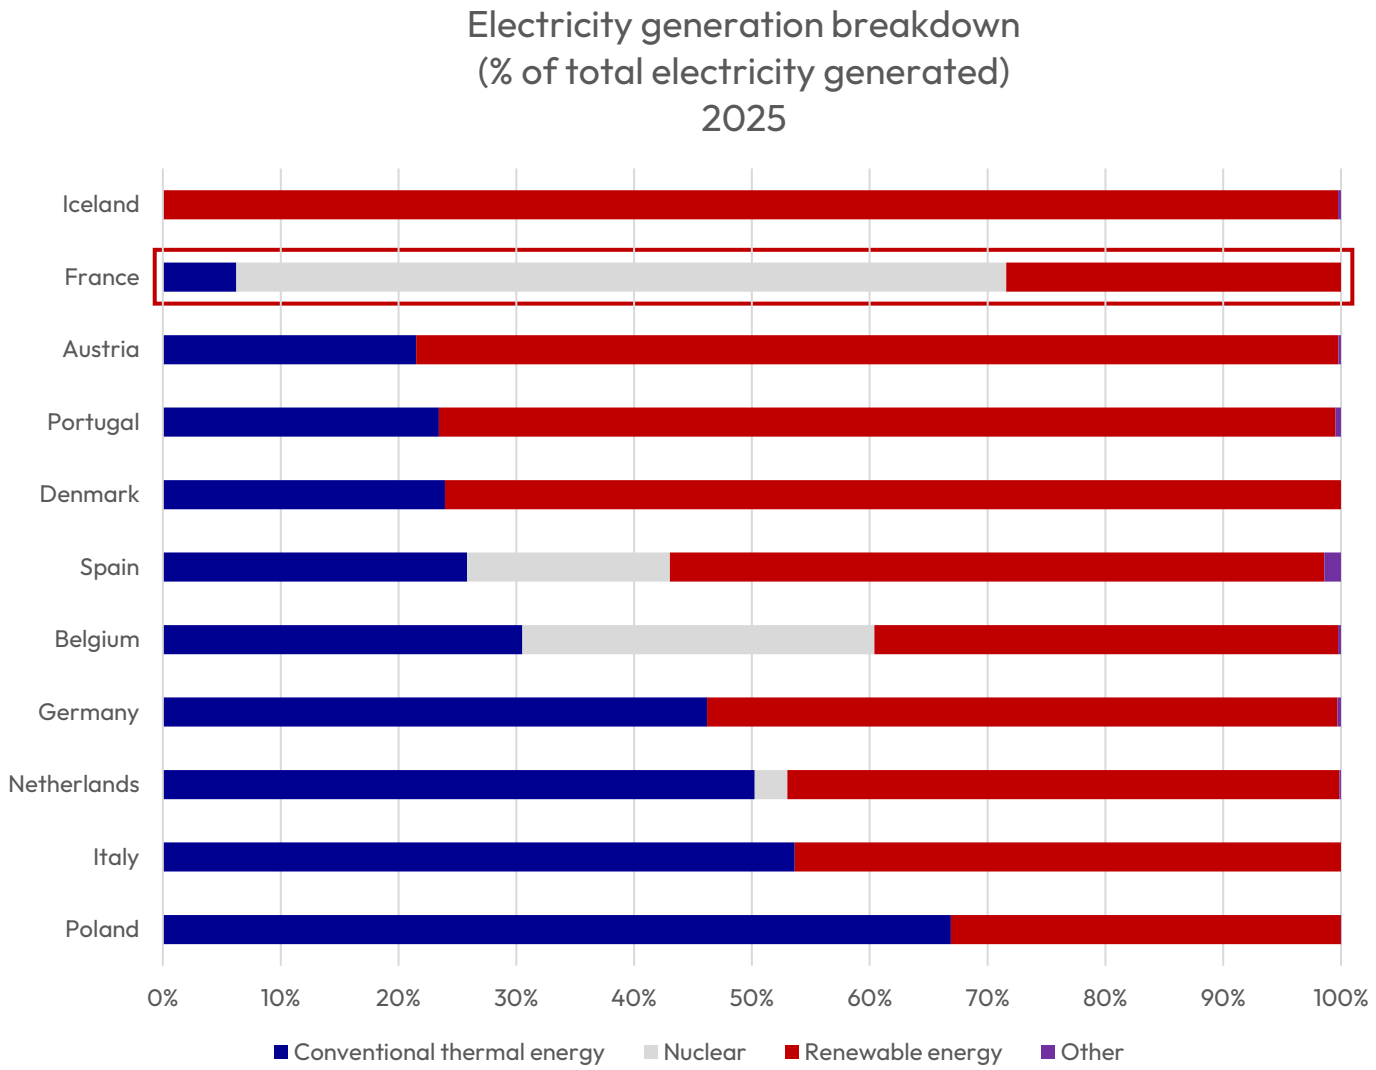

#7

Country in terms of performance on the UN Sustainable Development Goals (SDGs)

(SDSN, 2026)

Nuclear power at the heart of French electricity generation

Available at:
Welcome.BusinessFrance

65%

The share of nuclear power in French electricity generation in 2025.

#1

The leading country in Europe for nuclear power and ranked second in the world after the United States.

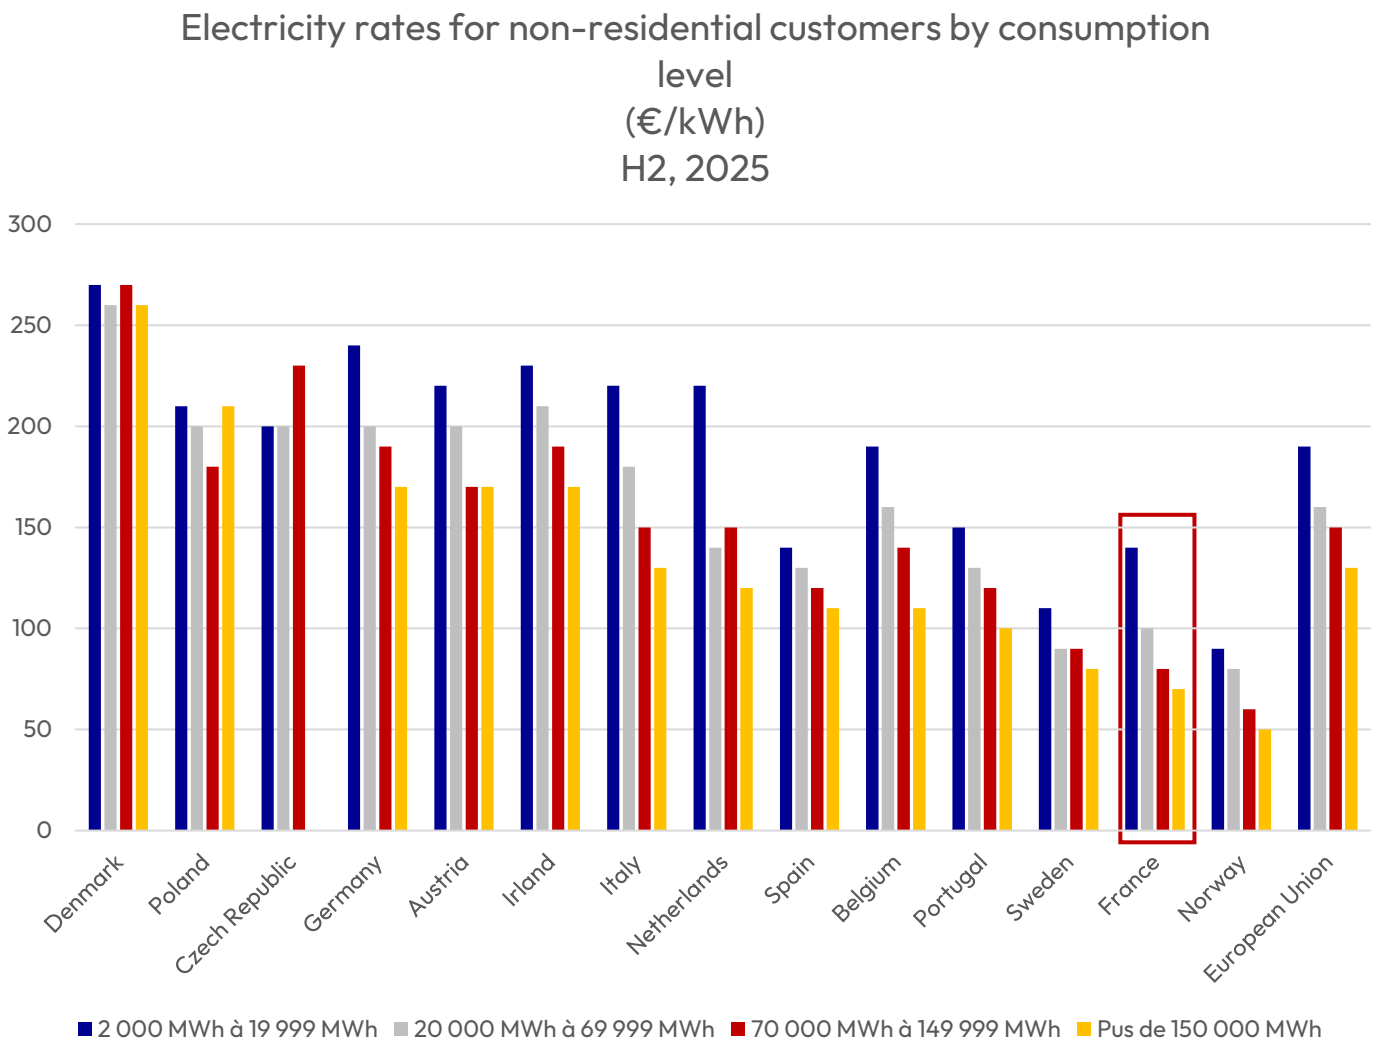

94%

The amount of electricity generated which came from decarbonized means of production in 2025.

Source: IEA, 2026

Competitive electricity rates for all consumers

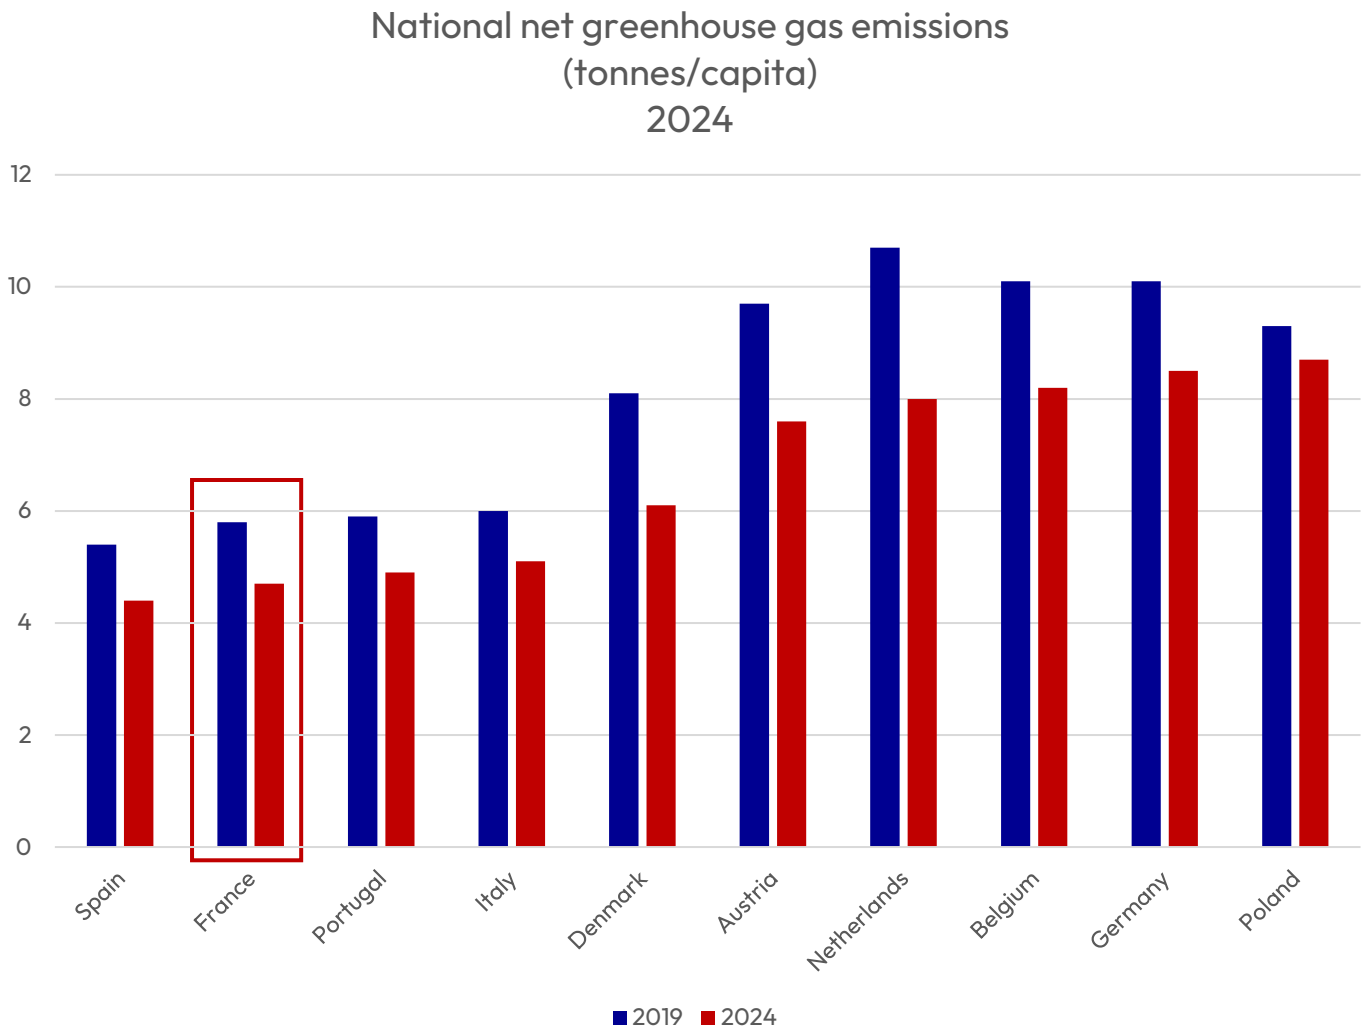

Available at:
Welcome.BusinessFrance

In France, electricity rates for large consumers are lower than the average among European Union countries.

Source: Eurostat, 2026

Environmental costs kept under control

5

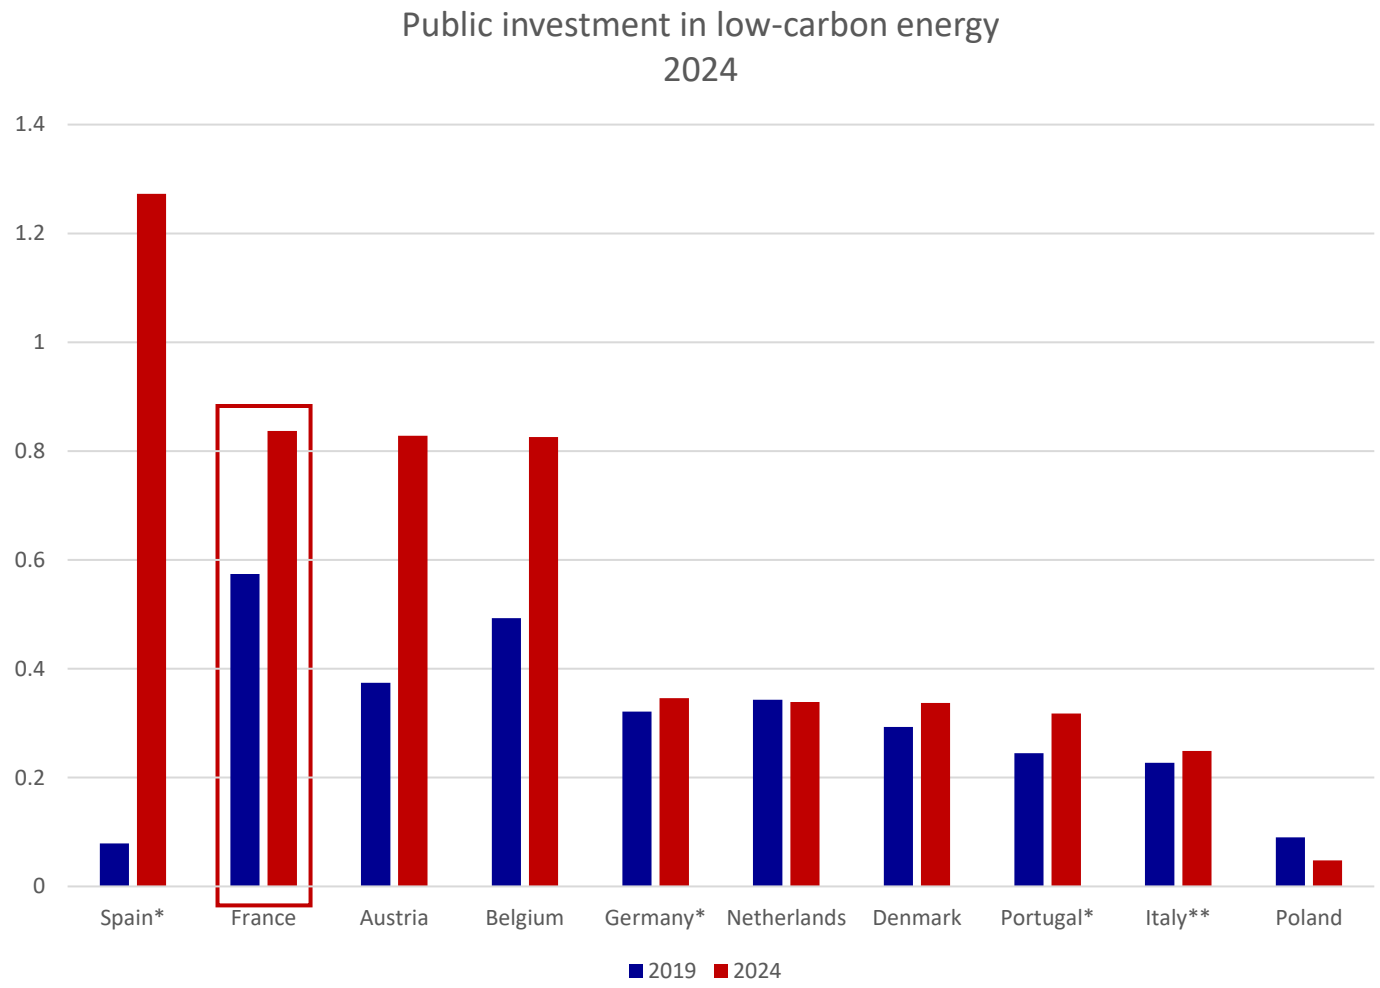

Number of tonnes of greenhouse gases emitted per capita in 2024 (in millions of PPP). One of the best environmental performances in Europe.

-19%

Change in the level of tonnes of greenhouse gases emitted per capita in France between 2019 and 2024.

Source: Eurostat, 2026

Investments in the decarbonization of its energy mix

0.8%

The amount of French GDP dedicated to public investment in low-carbon energy.

+0.26 percentage points

In GDP in the last five years.

110

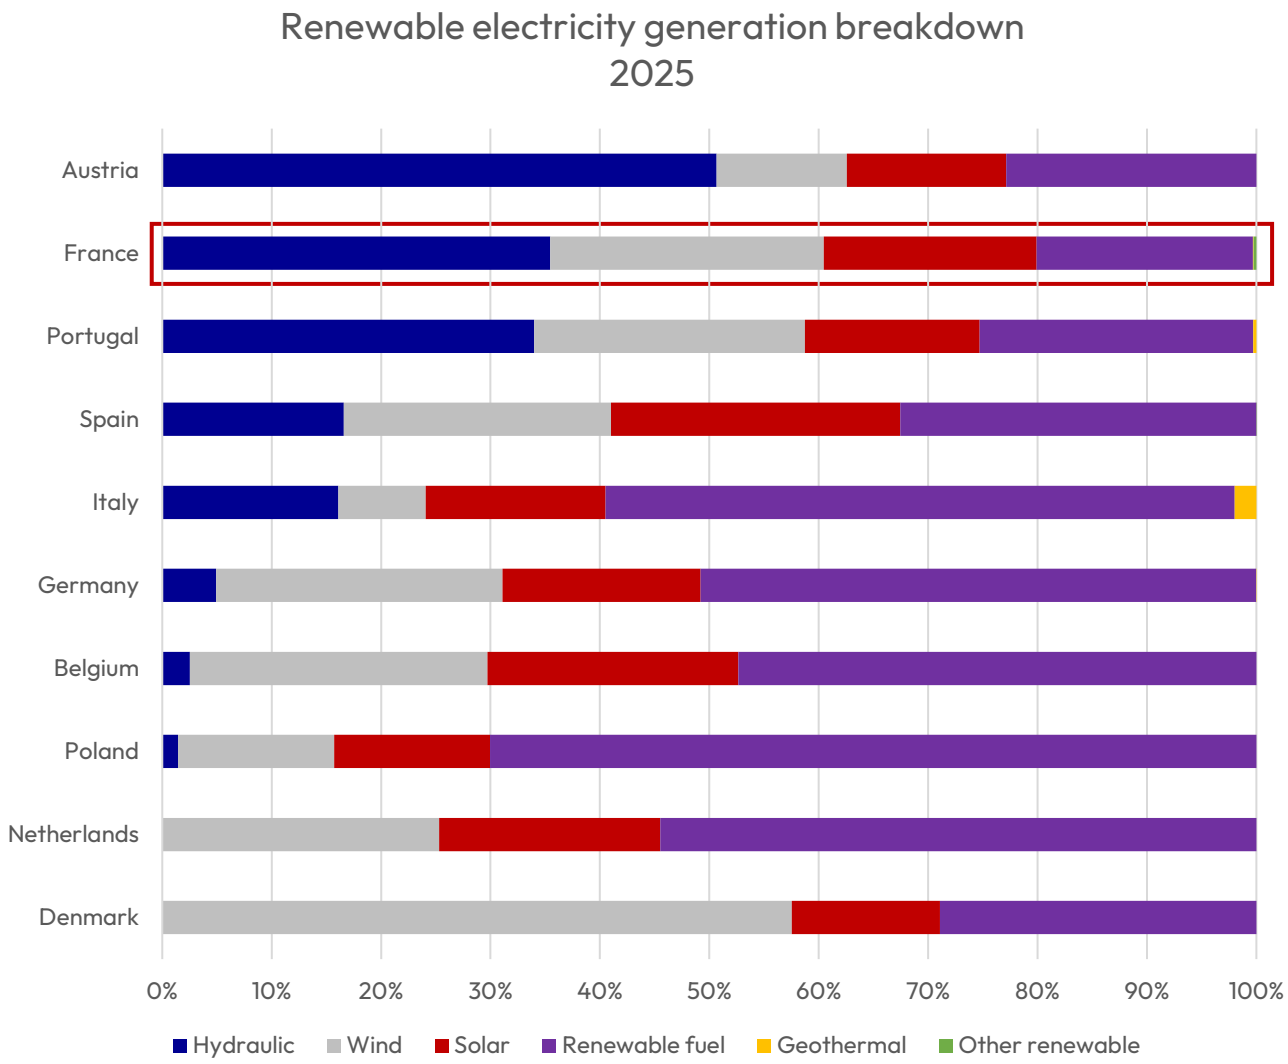

Hydrogen production projects dedicated to renewable energy or the energy transition have been identified in France since 2000, and 46 others are forthcoming by 2033.

* 2023

** 2022

Source: IEA, 2025

Opportunities to seize in solar and wind power

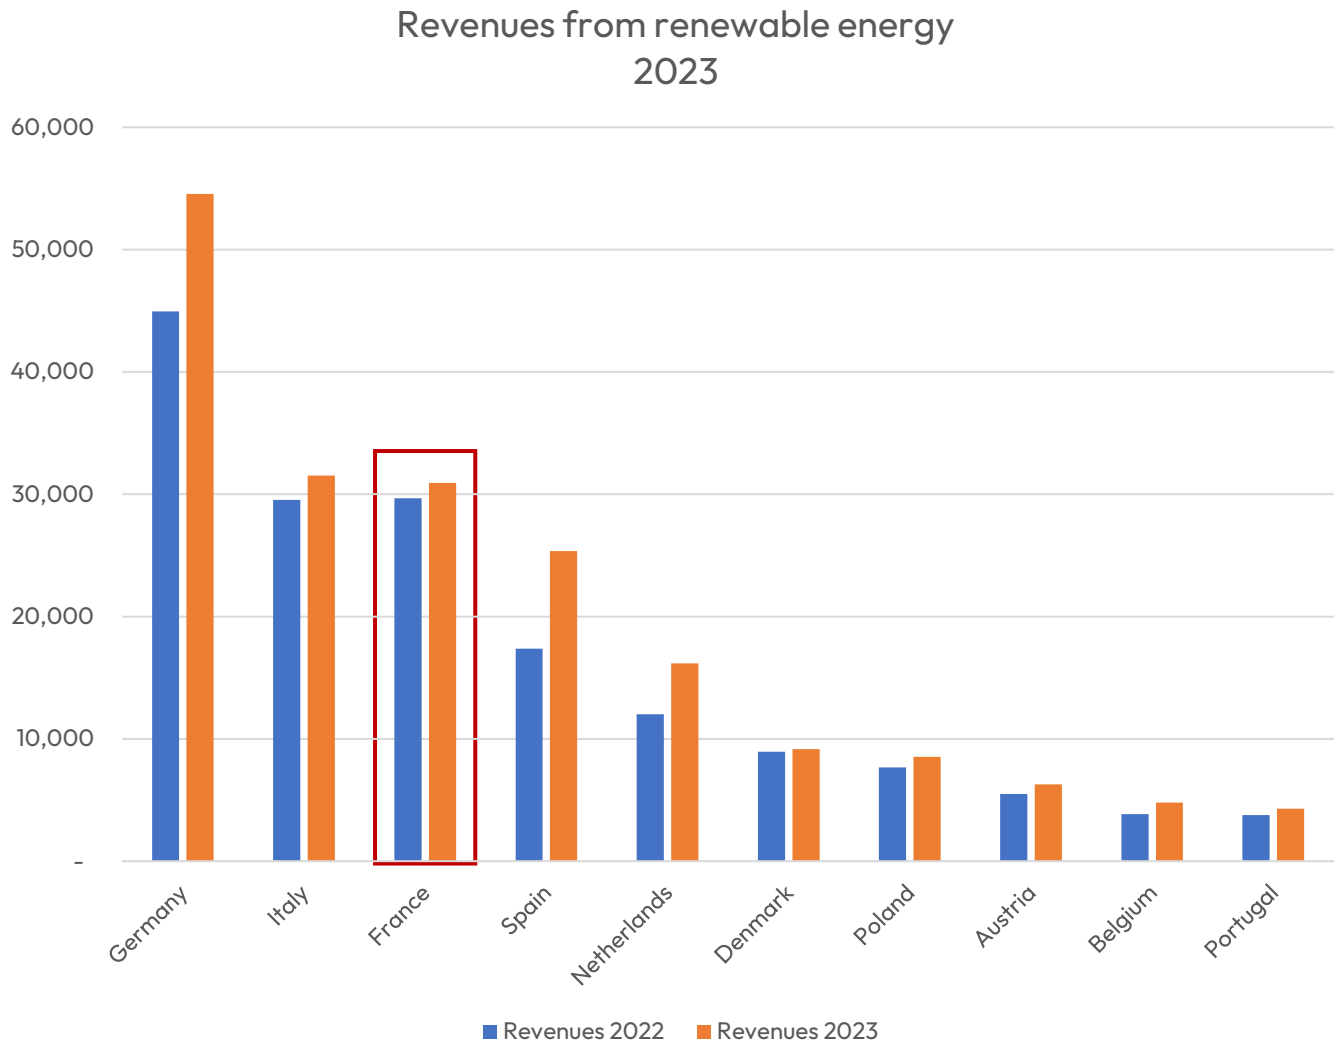

35%

Of the generation of electricity from renewable sources came from hydraulic power in 2025, ahead of wind power (25%).

Source: IEA, 2025

Green growth, providing opportunities

13%

The share in 2023 of revenues in the European Union from renewable energies generated in France, the third highest country in the EU.

#4

France’s position at European level in 2023, in terms of jobs in renewable energies (205,700 jobs).

Source: EurObserv’ER, 2025

Ecology at the heart of the ‘France Green Nation’ action plan

41 million fewer tonnes of CO_2

By 2030, thanks to the measures put forward by the Green Industry Act.

€54 billion

Investment as part of the “France 2030” plan, 50% of which will be dedicated to decarbonizing the economy.

50%

Reduction in greenhouse gas emissions by 2032 for the 50 most polluting sites, accounting for 55% of industrial emissions.

€8 billion

Aid per year until 2050 for energy-efficient renovations.

€23 billion

Investment generated by the Green Industry Tax Credit.
